

THIS IS EXCEPTIONAL CLEAN

CLEAN SPACE. HEALTHY ENVIRONMENT.

Improve air quality in your facility by choosing vacuums that are a sealed HEPA system or that have HEPA filters. Look for Carpet and Rug Institute (CRI) certified vacuums that are tested to remove soil, trap dust particles and protect carpet appearance.

Sanitaire®

GRAINGER®
||||| FOR THE ONES WHO GET IT DONE

Deliver an exceptional cleaning experience — every time, with industry-approved machines that are CRI certified, include HEPA filters and meet all LEED requirements.

What is a HEPA Filter or Sealed HEPA System?

- An exhaust filter that captures 99.97% of particles at 0.3 microns. Particles that size are more difficult to capture due to their mass, aerodynamic size, and the physical laws associated with particle movement behavior. This particle size is the test standard for achieving HEPA. However, a HEPA filter is also capable of capturing particles above and below 0.3 microns.
- On a sealed HEPA system, any exhausted air is filtered to HEPA efficiency, not just the filter. If the vacuum air path is not completely sealed, it can leak out prior to getting captured in the bag or the final filter.

What is CRI Certified?

- A third-party industry standard certification and testing organization.
- Vacuums are awarded Gold, Silver or Bronze based on the amount of dirt removed from the carpet and how efficiently dust particles are contained in the bag and filter.

What is LEED Qualified?

- LEED (Leadership in Energy and Environmental Design) is the most widely used green building rating system in the world. Available for virtually all building types, LEED provides a framework for healthy, highly efficient, and cost-saving green buildings.
- LEED Qualified vacuums have a sound level less than 70 dBA which allows for 24/7 daytime cleaning.
- Buildings should use LEED Qualified vacuums to maintain LEED Certification.

NOTE: HEPA filters have not been tested for filtering the COVID-19 virus.

Hard Floor Washer

VACUUM + WASH
ALL AT ONCE.

Introducing the Sanitaire® HYDROCLEAN® Hard Floor Washer + Vacuum. The only machine you'll need to clean hard floors. Clean with speed and ease. This timesaving tool does it all – vacuums and washes in one step – no spray bottles, mops, buckets or cloths. Get more done in less time and flip critical spaces faster.
