DUAL VIBRATION BARK CONTROL COLLAR

USER MANUAL

READ AND FULLY UNDERSTAND THIS MANUAL BEFORE USE

IMPORTANT SAFETY INFORMATION

- This product is designed for no-pain correction with enhanced vibration and tone technology, which helps to stop barking for small & medium dogs with **NO SHOCK**.
 - This product is Vibration Bark Control Collar, the prongs cannot deliver shock.
 - This product is **NOT** intended for use on dogs under 6 months old and less than 8 lb.
 - **NOT** for use with aggressive dogs. Use the product under supervision.
 - For the comfort of your pet, please wear the Prong Covers to the prong before use.
 - Avoid leaving the product on dog for more than 12 hours per day.
 - Check the contact area daily for signs of rash or a sore. If a rash or sore is found, **STOP** using the product immediately until the skin heals. **Never connect a leash to the collar.**
 - Wash the dog's neck area and the prong covers and prongs weekly with a damp cloth.
 - The product senses the dog's high-frequency barking and other dog's barking may have a small chance to activate the product.
- Decrease the sensitivity level when other dog's nearby.

PRODUCT INFORMATION

These are the components that you will find inside the box.

**BARK COLLAR DEVICE • STRAP • USER MANUAL
PRONG COVERS • USB CABLE**

01 • TEST THE PRODUCT

1A. CHARGE THE BARK CONTROL COLLAR BEFORE USE

You may charge the product via PC, Power Bank or Adapter with output voltage of 5V for 2~3 hours.

USB RECHARGEABLE 

DESCRIPTION OF POWER INDICATOR

-  BLINK IN GREEN, DEVICE IS ON CHARGE
-  SOLID IN GREEN, DEVICE IS FULLY CHARGED
-  SOLID IN RED, DEVICE IS CHARGED WITH IMPROPER CHARGER.

NOTES

Improper charger means chargers with output voltage over 5V.
Output voltage usually can be seen on surface of charger.
There will be no response when pressing the buttons if device is on charge.

1B. POWER ON THE BARK CONTROL COLLAR

Press and hold the button for 1 SECOND to POWER ON.

Indicator will be solid RED or GREEN after device is POWERED ON.

1C. SET THE BARK CONTROL COLLAR

Set the bark control collar to Test Mode, the display will show digit 0.

After that, blow or bark like a dog towards the microphone sensor located at the back of the product.

MICROPHONE SENSOR

Press the power button to get to Test Mode, make sure the digit shows 0 before test.

1D. THE BARK CONTROL COLLAR RESPONDS AT TEST MODE

When the device is set on Test Mode, whether the mode indicator is on RED or GREEN, it will vibrate, beep then deliver stronger vibration after you blow or shout towards the microphone sensor.

*If the product responds as described above,
you've succeeded at setting up the collar properly! ✓*

02 • PUT THE PRODUCT ON YOUR PET

2A. ATTACH THE STRAP TO THE BARK COLLAR

Follow the A-B-C-D steps instructed to thread the collar.

2B. PUT THE PRODUCT ON YOUR DOG

Please ensure to fit the product snugly, yet loose enough to allow one finger to fit between the strap and your pet's neck.

Now you have successfully put the Bark Control Collar on your dog and it's ready for training! ✓

03 • MODE SETTING

The following instruction will guide through the processes of switching modes.

Power ON the device by pressing and holding the Power Button for 1 second.

Mode indicator will display **GREEN** or **RED** after device is powered on. Press the Mode Button to switch Mode Indicator.

GREEN Mode Indicator means Vibration Mode.
RED Mode indicator means Strong Vibration Mode.

The product will go to next step if your dog keeps barking within 1 minute.

Will automatically back to Step 1 if the product is not activated over 1 minute.

06 • FREQUENTLY ASKED QUESTIONS & ANSWERS

Q: Why doesn't the product work when the dog barks?

A: Please first ensure to fit the product snugly, yet loose enough to allow one finger to fit between the strap and your pet's neck.

Some dogs has weak barking, in this case you will need to level up the sensitivity level. Thick coat on the neck area may also have small chance to decrease the sensing from the barking, trim the coat near the area where you place the product.

Q: Why is the product triggered sometimes in a noisy environment though the dog isn't barking?

A: Though we have optimized the barking detection to the best, some environment noises may have similar frequency to barking, which may have small chance to activate the product. Please lower the sensitivity level.

Q: Can I use the product when there are other dogs playing around?

A: Dogs will bark when playing and get excited, for the comfort and safety of your pet, we don't suggest using this product in such environment.

Q: How do I know if I can use this product for my pet?

A: The product is designed for healthy dogs over 6 months old, weighing no less than 8 lb.

Most importantly, this product cannot be used on unhealthy or aggressive dogs, and if you are unsure whether this product is appropriate for your pet, please consult your veterinarian or a certified trainer.

Q: Can this product stop my dog's howl?

A: No, this Bark Control Collar is designed to detect the barking only. It cannot detect or stop the howling.

Q: Can I charge this product with any type of charger?

A: No, you are suggested to charge this product with charger of 5V output voltage, because charger with output voltage of 9V or 12V may cause damage to the product. The product will stop charging automatically if input voltage becomes too high and the power indicator turns red.

Q: Will my dog stop barking completely?

A: The Bark Control Collar effectively and humanely stops all barking when it is worn. It should only be worn during periods of unwanted barking.

Q: Is the Bark Control Collar safe and humane?

A: Yes. The Bark Control Collar is designed to get your dog's attention, not to punish him. This product does not have the shock unit and it will only deliver tone & vibration correction. However, the initial Strong Vibration Correction may startle your dog.

If you have any other questions regarding this bark collar device,
don't hesitate to write or call us:

WARNING!

Please charge the product with 5V-Output charger only.

Warranty loss and charging damage
maybe caused by charging with improper charger.

**OUTPUT
5V**

NOTES

Improper chargers mean those with
output voltage over 5V.

Usually, the output voltage information
can be seen on the surface of the charger.

SUGGESTIONS FOR THE APPROPRIATE SENSITIVITY LEVEL

The environment noise, temperament and breed or size of your dogs may affect the bark control effect.

Here are suggestions for selecting the appropriate sensitivity level on different environment conditions.

Very Quiet Indoor Like No One At Home, Sleep Time or Late Evening

LEVEL 3~5 IS SUGGESTED FOR ALL SIZE OF DOGS

Environment with Normal Conversations

LEVEL 2~4 IS SUGGESTED

Noisy Environment, Dogs Playing Around, Loud TV or Music Playing

LEVEL 1~3 IS SUGGESTED

WARM TIPS

Above suggestions are for your reference only, please adjust the bark control collar to the appropriate sensitivity level based on the actual environment conditions.

NOTES

Level 5 is the most sensitive and Level 1 is the least sensitive.

The goal of SparklyPets is to permanently develop products that will help strengthen the relationship between dog and man. Our products offer sturdier, more comfortable and up-to-date pet products for everyday use.

We are always looking for ways to improve your outdoor adventures, training sessions and overall relationship with your dogs, by providing fashionable, professional, high quality products. We offer unique, functional, rugged pet products for everyday use, in order to make life easier for you and your precious pet.

Thank you for purchasing our product!
