HUMANE DOG BARK COLLAR RECHARGEABLE

USER MANUAL

READ AND FULLY UNDERSTAND THIS MANUAL BEFORE USE

IMPORTANT SAFETY INFORMATION

The intelligent Anti Bark Collar stops barking with progressively increasing sound and vibration stimulation.

It is humane and safe and does not use static shock stimulation.

Easy to use and test, activated by throat vibration when the dog is barking.

A microprocessor distinguishes your dog's bark from other environmental noises and automatically delivers a sound and vibration after each bark.

NOTE: When the collar is fitted correctly **IT DOES NOT MOVE.**

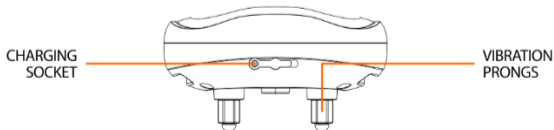

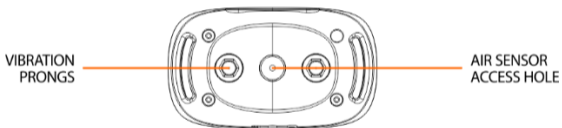

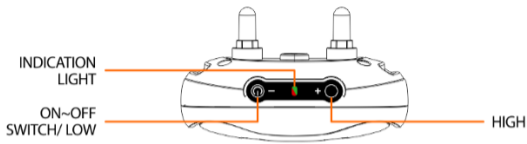

You can slide just one finger under the collar.

If it is **NOT FITTED CORRECTLY** it will go off randomly and **NOT** work when your dog barks.

MAIN FEATURES

- Combined tone and vibration functions
- Seven levels of sensitivity functions
- Quick and easy test procedure
- Convenient battery life LED indicator
- Weather casing- can be used in light to mild rain, but is not waterproof because of the sound sensor.

PRODUCT INFORMATION

01 • USAGE INSTRUCTIONS

The mode button is (🔊) Press the (🔊) for 2 secs the Green Light will come on.

You turn on the collar in Sound and Vibration mode.

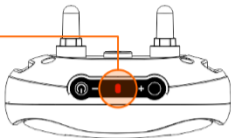

Press the (🔊) 2 secs green lights will go off. You have now turned the collar off.

When it is in **GREEN LIGHT** Mode, what the Bark Collar actually does when Your Dog Barks:

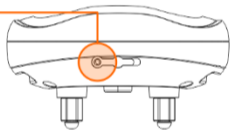

02 • CHARGING INSTRUCTIONS

The device needs to be charged when the **RED LIGHT** continues flashing slowly for 30 seconds, and then turns off automatically.

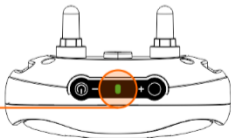

01. Open the battery charging rubber cover on the Anti Bark Collar, plug one end of the cable in the charging port and connect the other end to the adaptor, computer, notebook or power bank.

NOTE: Please make sure that the adaptor output is 5V/500-1000mA).

The **RED LIGHT** will be steady on when charging.

02. Plug the Lithium Polymer Charger into an electrical power outlet of ordinary household voltage (110-230V) based on your local standard.

03. The **GREEN LIGHT** will be steady on when fully charged within 1.5 to 2 hours.

03 • TEST THE DEVICE

Turn the collar ON from the (⏻) button.

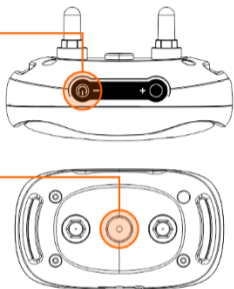

Gently blow air into the sensor access hole. Blowing into the sensor imitates the vibrations of the dog's barking and activates the sensor (**BARK 01**).

Within 40 seconds from previous sensor activation, blow into the sensor access hole again (**BARK 02**). Use the table on the page 03 to go through the 7 - tired cycle, repeating the steps until you reach the sleep mode.

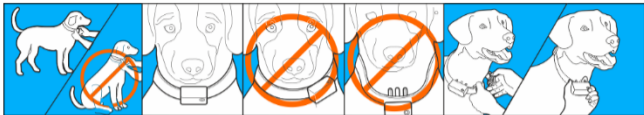

Now that you have tested the collar, take the sensitivity all the way down to number **1** by pressing the (=) button on the collar.

If your dog barks and the collar does not beep, press the (+) button once this will increase the sensitivity to number **2**, if your dog barks again and no beep, once again press the (+) button, continue this until the collar beeps immediately after your dogs bark.

You have successfully test the Bark Control Collar! ✓

04 • PUT THE PRODUCT ON YOUR PET

Ensure that you have turned the collar off. Check the collar and adjust Strap to the correct length, these prongs must be against your dog's skin to work, if need be, shave your dog's neck to get good contact, remember that is only for a short period of time.

Place the collar around your dog's neck, it must not move, if it does then adjust and tighten the collar. Hold the unit and try to move it, when it does not move and you can slide just one finger under the collar that is now correctly fitted.

Prongs need to be either side of the windpipe.

Now leave the collar on your dog, do not turn the collar back on.

Wait for 24~48 hours until your dog totally ignores the collar, initially they will scratch at it and just paw at it, when that completely stops we are ready to start the training. You must be present when you turn on the collar and start the training.

DON'T LET YOUR DOG TO FIGURE IT OUT, TEACH THEM FROM THE START!

Now you have successfully set the Bark Control Collar on your dog and it's ready for training! ✓

05 • TRAIN YOUR DOG

NOTE: DO NOT UNDER ANY CIRCUMSTANCES PUT THE COLLAR ON YOUR DOG WITHOUT FIRST TESTING IT!

Now we are going to start the training. Under no circumstances should you just put the collar on your dog and leave it them to figure out. Your dog will get confused and extremely upset. You must teach them what you expect from them.

Remember every time your dog barks, you give the command **NO BARK** and the collar will reinforce that command. If your dog continues to bark then you give a much more forceful **NO BARK** and the collar will do the same thing, over and over again, if your dog continues to bark.

This way your dog will understand that the beep means **NO BARK** and the beep and vibration it's still a **NO BARK!** And the way to stop the discomfort is to stop barking.

Please remember that this collar is a behavioral aid only, and is recommended to be turned off when your dog is playing.

06 • FREQUENTLY ASKED QUESTIONS & ANSWERS

Q: The collar just keeps going off.

A1: The sensitivity is set too high. You reduce the sensitivity by pressing the minus button.

A2: The collar is not tight enough, please tighten the collar.

Q: My dog shakes his head and the collar goes off.

A: Because the collar feels unusual to your dog they will keep shaking their heads and scratching forcing the collar to activate.

Q: My dog barks but the collar does not activate.

A: Check the battery by performing a full test.

If the collar tests correctly, then you will need to increase the sensitivity of the collar.

Making it more sensitive will make it activate easier.

Or the collar is too loose, please tighten the collar.

Q: Collar will beep but will not vibrate?

A: There is enough charge in the battery to make it beep, but not vibrate. You should charge the battery.

07 • RECOMMENDATIONS

In any of the cases described below, please, contact us so that we may help you.

- 01.** Our studies, based on our clients feedback, have shown that our collar is not working for 5% of the dogs, due to their temperament.
If this happens - please, do not worry and contact us.
- 02.** There must always be a gap between the collar and the dog's neck, so that one finger can fit comfortably. When you've determined the desired collar length, cut the excess with scissors and light the end with a light flame to stop the threads from unraveling.
- 03.** Under no circumstances, you must not attach a leash to the anti barking collar!
- 04.** If the collar stopped to beep or vibrate - try to use another battery, perhaps the charge of the battery is not enough and, because of this, the collar does not work properly. Periodically disassemble the device to clean the dog hair that tangled around the axle from the vibration unit, so that the collar will vibrate again.
- 05.** If the collar often enters in the 1 minute protection mode, then you must decrease the sensitivity level, by pressing the “-” button!
- 06.** Don't forget adding the probes on the collar before putting it on your dog's neck!
- 07.** Do not use the collar when you wash the dog/ if he plays near pools or lakes/ in heavy rain!
- 08.** Do not allow the dog to chew the collar!

CAUTION!

NOTES

Do not allow your dog to chew this collar.
You should also attempt to minimize scratching or clawing at the casing.

This device is made up of plastic and electronic components
that are not digestible.
Consult your local vet if your dog swallows any part of this product.

The collar is not intended for use as a restraining collar.
If you are using a leash, use it with a separate restraining type of collar.

*Please follow the caution notes for a long lasting life of the product
and for the good of your beloved dog.*

The goal of SparklyPets is to permanently develop products that will help strengthen the relationship between dog and man. Our products offer sturdier, more comfortable and up-to-date pet products for everyday use.

We are always looking for ways to improve your outdoor adventures, training sessions and overall relationship with your dogs, by providing fashionable, professional, high quality products. We offer unique, functional, rugged pet products for everyday use, in order to make life easier for you and your precious pet.

Thank you for purchasing our product!
