## FITTING INSTRUCTIONS

### STEP 1

Adjust the belt on both sides of the fanny pack, ensuring the buckle is centered.

Try it on and adjust it until it fits comfortably on your waist. Secure the excess belt by tightening and fastening it with Velcro.

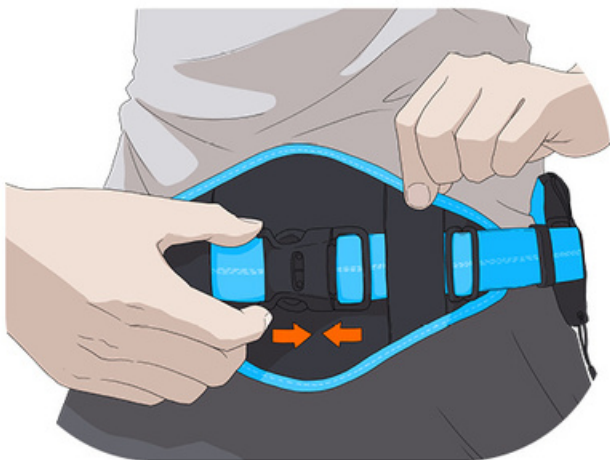

### STEP 2

Place the belt with the buckle in the front and add the lumbar support to it.

### STEP 3

Adjust the lumbar support so the buckle sits in the middle between the elastic straps.

### STEP 4

Rotate the fanny pack so the pockets are in the front and the lumbar support at the back. If needed, adjust the lumbar support to fit well on your back while keeping the buckle centered on the support.
