

#7003; 3-Point Entrance Mortise Mechanism Stainless Steel With Roller Cams

* ALL DADDO GROOVES MUST BE FREE OF ANY PARTICULATE OR SAWDUST BEFORE AND AFTER INSTALLATION.

*Four locking points consisting of latch, deadbolt, top and bottom shootbolts and roller cam. Additional roller cam extensions can be added for more locking points.

*Use for active door or window.

*Material: Stainless Steel.

Function: to lock:

*Lifting the lever up engages deadbolt, roller cam and shootbolts. Turning the cylinder locks all points into place.

To unlock:

*Turn cylinder to unlock all points. Pushing the lever down will disengage roller cam, deadbolt and shootbolts. Note latch functions in unlocked position.

* 1-3/4" (45mm) Backset

Faceplate:

* 5/8" (16mm) width

*With (1) roller cam extension:
Minimum height door: 75.625"
Maximum height door: 106.375"

Extensions available for taller doors. See pages 173 & 198 for more information.
For 10' doors add two (2) 19 11/16" [500. mm] extension with roller cam (500 EXTIRC) or without roller cam (500 EXT1).
For doors taller than 10 feet, simply add more extensions with or without roller cams.

7003 GROOVE
