Bush Baby Stealth Dog
SKU: BBSDog

USER MANUAL
FCC CE
THANK YOU FOR PURCHASING THE BBS DOG

Please read this manual before operating the camera and keep it handy. The Bush Baby Stealth Dog is the perfect device to protect your young ones. Even if the camera is handled by someone curious, the electronics are indistinguishable from the original electronics for making the dog talk. Please note however, it is not a toy and is designed to be used as a security device.

Your purchase should include:
1 x Bush Baby Stealth Dog
1 x Remote Control
1 x AC Adapter
1 x Mini-B Cable
1 x User Manual

Contact 770-694-6923 if you are missing any of these components.

OPERATING THE CAMERA

Note: If you are not located in the US, or if you intend to use this product anywhere other than the US, you will need to purchase a converter in order to use the AC wall plug in and avoid damaging the product. Because different countries use different voltages in their electrical wiring, you will need a converter that adapts to the current in your particular country.

IMPORTANT WARRANTY INFORMATION: If the warranty sticker on your device has been removed or tampered with, your lifetime warranty will be voided. You may be charged fees or denied a return should this happen.

NOTICE: Allow the device to charge 4 – 6 hours before using.

CHARGING THE BATTERY
1. The battery on this device is internal. You will need to remove the white box located inside the dog, and connect the provided USB cable to the charging port (see page 3).
2. Plug the other end of the USB cable into the wall AC adapter and plug it into the wall.
3. Wait 6 to 8 hours.
   a. The larger the battery capacity, the longer it takes to charge.

HOW TO TURN ON THE CAMERA
1. Point the remote control at the dog’s right eye (remote sensor), and press the “Power button” (see page 4). The indicator light on the back of the unit will turn on.
2. The camera is now in Standby Mode.

HOW TO TURN OFF THE CAMERA
1. Press the “Power Button” on the remote control (see page 4). The indicator light will turn off.
2. The camera is now off.

HOW TO RECORD VIDEO
1. When the camera is in Standby Mode, press the “Video Button” one time (see page 4). The indicator light will flash three times.
2. Once the indicator light turns off, the camera is now recording video.
3. To stop recording, press the “Video Button” once, and the device will enter back in to standby mode.

HOW TO TAKE PICTURES
1. When the camera is in Standby Mode, press the “Photo Button” (see page 4). The indicator light will flash once.
2. Once the indicator light flashes, the picture has been taken.

HOW TO RECORD MOTION DETECTION

1. In Standby mode, press the Motion Detection button one time (see page 4). The indicator light will flash three times and then turn off.

2. The unit is now in motion detection mode and will begin recording video once motion is detected. There will be no LED indicator to indicate when motion is detected.

HOW TO STOP RECORDING

1. To stop recording, you will need to press the same button you used to begin recording.
a. If you pressed the Video button, press the Video button once more.

b. If you pressed the Motion button, press the Motion button once more.

2. The device will reenter Standby mode (solid light).

---

**MICROSD CARD SLOT**

1. The memory on this device is internal. There is no MicroSD card.

---

**RETRIEVE THE FILES TO YOUR PC**

1. Connect the device to your PC using the USB cable. Insert one end of the charging cable into the charging port, and the other end of the USB to your computer.
2. Power on the device using the remote and wait for your computer to recognize it.
3. Locate “Removable Disk” inside the (My) Computer folder.
   - AutoPlay Removable Disk > Open folder to view files
Or... Go to Start > Computer > Removable Disk

4. Open the Removable Disk drive.
5. Open the [folder name] folder.
6. Double click the file you want to view.
   • VLC Player is recommended for watching videos.

---

If you are having video playback issues, such as a completely black video recording or “squiggly lines”, we recommend you use VLC media player to play back the videos. It can be downloaded for free from www.videolan.org

COPYING AND DELETING YOUR FILES
The video files created are just like any other file on your computer, and can be managed in the exact same manner.

- To save a file, you want to select the file, right click your mouse on the file name, and then choose “Copy” from the menu. Next, go the location you want the save the file to. Right click your mouse, and then chose “Paste.” This will copy the file to your computer.

- To delete a file, right click your mouse on the file name and choose “Delete” from the menu. You can quickly select all of the files by pressing “CTRL+A” on your keyboard.

- If you are using MAC OS X, you must empty the trashcan after
you delete a file. If this is not done, the SD card will fill with hidden files, and the device will no longer record new files.

SETTING THE TIME AND DATE ON THE VIDEO FILES
You will need to connect your device to your computer in order to set the time and date stamp.

1. Visit http://time.mgiddownloads.com
2. Choose “All Bush Baby Stealth” and your time zone in the dropdowns and click download.
3. Right click and “cut” the downloaded time file.
4. Locate “Removable Disk” inside the (My) Computer folder.
   a. Go to Start > Computer > Removable Disk

5. Open the Removable Disk drive.
6. Right click with your mouse and paste the downloaded time file. Alternatively, if you cannot get the above method to work, do the following:
   7. Right click anywhere in the blank white space.
   8. Scroll down to “New”. 
9. Click “Text Document”.

    *The title must be in all lowercase letters!*

Before Step 8

After Step 8
11. Open the text document.
12. Enter the date/time in the following format:
   a. Example:
      2016/08/08 15:00:00
13. Save the text document.
14. Unplug the device from your computer.

**Power on the device and begin a test recording to confirm date/time setting succeeded.**
TROUBLESHOOTING

THE DEVICE WON’T TURN ON
- Charge the device for at least 4 hours before the first use.
- Make sure the charging cable is securely inserted into the device and into the power source.

THE DEVICE ISN’T CHARGING
- Replace the battery or charging cable.
- If you are charging via a wall power source, you may need to charge via your PC.

MY COMPUTER DOESN’T RECOGNIZE THE DEVICE
- Unplug the device from your PC and reboot the device.
- Unplug the device from your PC and reboot your PC.
• Try using a different USB slot on your PC.
• Replace the USB cable.
