Inside View

- Removable Battery
- Indicator Light
- MicroSD Card Slot
- Battery Connector
BEFORE YOU START

To preserve battery power, your device will come with the battery connector disconnected. Before attempting to use the device be sure to connect the battery’s connector to the circuit board power lead.

Note: If you are not located in the US, or if you intend to use this product anywhere other than the US, you will need to purchase a converter in order to use the AC wall plug in and avoid damaging the product. Because different countries use different voltages in their electrical wiring, you will need a converter that adapts to the current in your particular country.

IMPORTANT WARRANTY INFORMATION: If the warranty sticker on your device has been removed or tampered with, your lifetime...
warranty will be voided. You may be charged fees or denied a return should this happen.

OPERATING THE CAMERA

NOTICE: Allow the device to charge 4 – 6 hours before using.

CHARGING THE BATTERY

1. Remove battery from the inside of the device. See page 4 to locate the battery.
2. Disconnect the battery connector that is connecting the battery to the circuit board (red piece connecting black and red wires). Be careful not to pull on the wires as that could damage them.
3. Connect the connector on the battery to the connector on the charging adapter (see page 6).
4. Plug the USB into the charging adapter.
5. Plug the other end of the USB cable into the AC wall adapter.
6. Wait 6 to 8 hours.
   a. The larger the battery capacity, the longer it takes to charge.

HOW TO TURN ON THE CAMERA
1. Point the remote control at the camera and press the “Power button” (see page 5). The indicator light inside the unit will turn on.
2. The camera is now in Standby Mode.

HOW TO TURN OFF THE CAMERA
1. Press the “Power Button” on the remote control once more. (The indicator light will turn off)
2. The camera is now off.

HOW TO RECORD VIDEO
1. When the camera is in Standby Mode, press the “Video Button” one time (see
page 5). Indicator light will flash three times.

2. Once the indicator light turns off, the camera is now recording video.

3. To stop recording, press the “Video Button” once, and the device will enter back in to standby mode.

HOW TO TAKE PICTURES

1. When the camera is in Standby Mode, press the “Photo Button” (see page 5). The indicator light will flash once.

2. Once the indicator light flashes, the picture has been taken.

HOW TO RECORD MOTION DETECTION

1. In Standby mode, press the Motion Detection button one time (see page 5). The indicator light will flash three times and then turn off.

________________________________________

10 Version 2.3
2. The unit is now in motion detection mode and will begin recording video once motion is detected. There will be no LED indicator to indicate when motion is detected.

3. You may exit motion detection mode by pressing the “motion detection button” once more. The device will enter standby mode.

MICROSD CARD SLOT
To access the MicroSD Card Slot, you must look inside the device.

1. Gently push the MicroSD Card into the slot. The gold contacts on the card will be inserted first, and they should face the front of the device. You will feel some spring resistance before the card clicks in to place.
2. **Never** force the card into the Card Slot under any circumstance. Otherwise, the unit or the MicroSD card itself will be damaged.

3. To remove the SD card, gently push the card in so that it clicks.

4. The internal spring tension will eject the card.

**MicroSD cards 65GB and above will require special formatting to work.** The device will not function with these cards if they are not properly formatted beforehand.

Visit [www.mgidownloads.com/Software](http://www.mgidownloads.com/Software) and download the “**guiformat.zip**” file. Extract the files and follow the instructions in the “64GB SD Card Formatting.pdf” document.

**IMPORTANT NOTICE:** Ensure that the device is off before inserting the MicroSD card.
Otherwise potential corruption of the card file(s) may occur.

**RETRIEVE THE FILES TO YOUR PC**

1. Remove the MicroSD card from your device and plug it into your PC using the provided card reader.
2. Locate “Removable Disk” inside the (My) Computer folder.
   - AutoPlay Removable Disk > Open folder to view files
Or... Go to Start > Computer > Removable Disk

3. Open the Removable Disk drive.
4. Open the [folder name] folder.
5. Double click the file you want to view.
   • VLC Player is recommended for watching videos.

COPYING AND DELETING YOUR FILES
The video files created are just like any other file on your computer, and can be managed in the exact same manner.

- To save a file, you want to select the file, right click your mouse on the file name, and then choose “Copy” from the menu. Next, go the location you want the save the file to. Right click your mouse, and then chose “Paste.” This will copy the file to your computer.

- To delete a file, right click your mouse on the file name and choose “Delete” from the menu. You can quickly select all of the files by pressing “CTRL+A” on your keyboard.

- If you are using MAC OS X, you must empty the trashcan after
you delete a file. If this is not done, the SD card will fill with hidden files, and the device will no longer record new files.

**SETTING THE TIME AND DATE ON THE VIDEO FILES**

You will need to remove the MicroSD card from your device and plug it into your computer. See page 4 to locate the MicroSD card slot on your device.

1. Visit [http://time.mgiddownloads.com](http://time.mgiddownloads.com)
2. Choose “All Bush Stealth” and your time zone in the dropdowns and click download.
3. Right click and “cut” the downloaded time file.
4. Locate “Removable Disk” inside the (My) Computer folder.
a. Go to Start > Computer > Removable Disk

5. Open the Removable Disk drive.
6. Right click with your mouse and paste the downloaded time file.

Alternatively, if you cannot get the above method to work, do the following:

7. Right click anywhere in the blank white space.
8. Scroll down to “New”.
9. Click “Text Document”.
10. **Rename “New Text Document” as “time”**.

*The title must be in all lowercase letters!*

**Before Step 8**

**After Step 8**

11. Open the text document.
12. Enter the date/time in the following format:
   a. Example:
      2016/08/08 15:00:00

13. Save the text document.

14. Unplug the MicroSD card from your computer and reinsert it into your device.

**Power on the device and begin a test recording to confirm date/time setting succeeded.**

**TROUBLESHOOTING**

**THE DEVICE WON’T TURN ON**

- Charge the device for at least 6 hours before the first use.
- Make sure the charging cable is securely inserted into the device and into the power source.
THE DEVICE ISN’T CHARGING

- Replace the battery or charging cable.
- If you are charging via a wall power source, you may need to charge via your PC.

MY COMPUTER DOESN’T RECOGNIZE THE DEVICE

- Unplug the SD card from your PC and reboot the device.
- Unplug the SD card from your PC and reboot your PC.
- Try using a different USB slot on your PC.
- Replace the USB cable.
