Thank you for purchasing the Compact Wireless Cell Phone Bug Detector

Please read this manual before operating the Compact Wireless Cellphone Bug Detector and keep it handy.

The Compact Wireless Cell Phone Bug Detector is not only extremely easy to use, it is also portable enough to take with you everywhere. Simply turn it on and place by a cellphone and the CDB200 will let you know exactly when your phone is transmitting anything. Modern hackers and their spyware can covertly turn on a phone's microphone and listen in at any time, but with the CDB200, you can monitor this sort of activity anywhere, anytime!

Your purchase should include:
1 x CDB200
1 x Charging Cable
1 x Instruction Booklet

Contact 770-694-6923 if you are missing any of these components.

OPERATING THE COMPACT WIRELESS CELL PHONE BUG DETECTOR

IMPORTANT NOTICE: Allow the device to charge 4 – 6 hours before using.

HOW TO CHARGE THE BUG DETECTOR
1. Insert the USB cable into the USB port of the Bug Detector.
2. Insert the USB cable into the USB port of your computer.
   • The red Charging Indicator Light will turn on while charging.
   • The Charging Indicator Light will turn yellow/orange when charging is complete.

HOW TO TURN THE BUG DETECTOR ON/OFF
1. To turn the Bug Detector ON move the Power Switch up into the ON position.
   • The green Power Indicator Light will turn on.
     o The device is now ON.
2. To turn the bug detector OFF move the Power Switch down into the OFF position.
   • The green Power Indicator Light will turn off.
     o The device is now OFF.

HOW TO TEST THE BUG DETECTOR
IMPORTANT NOTICE: Ensure your Smartphone is connected to the internet, and there is no magnetic interference.
1. Turn the Bug Detector ON.
2. Place the Bug Detector near a wireless router.
   • The red Detection Indicator Light will flash rapidly.
   OR
3. Place the Bug Detector near your Smartphone.
4. Use your Smartphone to make an internet call (Facetime, Skype, etc.)
   • The red Detection Indicator Light will flash rapidly.

TIP: If the red Detection Indicator Light is not flashing, move the Bug Detector closer.

HOW TO DETECT BUGS
1. Close all running programs on your Smartphone.
2. Turn the Bug Detector ON.
3. Place the Bug Detector near your Smartphone.
4. Make calls as usual.
   • The red Detection Indicator Light will flash rapidly (as it did in testing) when bugs are detected.

TIP: If the red Detection Indicator Light flashes intermittently, it does not mean a bug is being detected.

TROUBLESHOOTING

THE DEVICE WON’T TURN ON
• Charge the device for at least 4 hours before the first use.
• Make sure the charging cable is securely inserted into the device and into the power source.

THE DEVICE ISN’T CHARGING
• Replace the battery or charging cable.
• If you are charging via a wall power source, you may need to charge via your PC. The AC adapter might be bad.
