THANK YOU FOR PURCHASING THE BLUETOOTH HIDDEN CAMERA

Please read this manual before operating the Bluetooth hidden camera and keep it handy.

Hiding a spy camera and microphone in a Bluetooth is clever. Not only will the LED indicator alert you to whether you’re filming or not, but they give you the freedom to talk to yourself without seeming weird. Unlike some devices, fiddling with it could actually increase the illusion rather than raise suspicions. The earpiece is comfortable and can be worn all day. This small and practical device looks right at home whether worn by business people, students, journalists, security personnel, law enforcement, or tourists.

This unit records full color 640*480 resolution video which is stored to 4GB of internal memory. You also have the option of taking 1280*960 resolution photos. The battery life lasts approximately 1.5 hours.

Your purchase should include:
1 x Bluetooth Hidden Camera
1 x Rubber Earpiece Cover
1 x Plastic Ear Hook
1 x USB Cable
1 x Instruction Booklet

Contact 770-694-6921 if you are missing any of these components.
