WATCH WITH NIGHT VISION
SKU: NightWatch

THANK YOU FOR PURCHASING THE NIGHTWATCH

Please read this manual before operating the NightWatch and keep it handy.

This watch has a stylish design that suits any occasion and is an inexpensive and covert device you can rely on for any event. The modern black face of the unit conceals a recorder capable of gathering video data while still keeping time. This particular watch is the latest step in technology, providing not only a higher resolution than previous watch cameras but also a multitude of options that tailor it to your needs.

Your purchase should include:

- 1 x NightWatch
- 1 x USB Cable
- 1 x Software Disk
- 1 x Instruction Booklet

Contact 770-694-6921 if you are missing any of these components.
GETTING TO KNOW YOUR NIGHTWATCH

A: Mode Indicator Light
- A solid blue light indicates video mode.
- A solid red light indicates camera mode.
- A solid red and blue light indicates audio only mode.

B: Video Camera Button
- Turn On/Off.
- Pause.

C: Traditional Time Handle
- Use this to adjust/set the time on your watch.

D: Microphone
- Microphone nut A is already in place on the watch.
- Microphone nut B is in a plastic bag.

E: HD Camera

F: USB Port
- Connection for charging camera.
- Connection to PC for file transfers.

G: Mode Button
- Video Camera.
- Photo Camera.
- Audio Only.
- Infrared Sensor Mode.

Microphone Nuts

- Microphone Nut A (Figure 2) is designed to allow audio recording. The whole in the center of the nut allows the microphone to easily record sounds.
- Microphone nut B (Figure 3) is not designed to allow audio recordings. If you are in an excessively humid or dusty environment, please use Nut B.
OPERATING THE NIGHTWATCH

BEFORE YOU START

*Important Note:* Do not use excessive force when operating your watch. The buttons are sensitive and can be damaged easily if pushed with too much force.

*Important Note:* Allow the device to charge for 4-6 hours prior to using.

HOW TO SET THE DATE/TIME STAMP FOR RECORDINGS

1. Plug the watch into your PC using the USB cable.
2. Be sure the indicator light is red and blue. If not, unplug the device and try again.
3. Locate “Removable Disk” inside the file browser on your computer.
4. Open the Removable Disk drive.
5. Right click anywhere that is blank white space.
6. Hover over “New”.
7. Click “Text Document”.
8. Title the document as “time”.
9. Open the document.
10. Enter the current date using the following format (military time):
    a. 2016.08.08 15:00:00 Y
    b. Do not forget the “Y” at the end. Date/Time set will not work without it.
11. Save the text document.
12. Unplug the device from your computer.
13. Power the device on and record a test video to confirm data/time set was successful.

HOW TO USE THE VIDEO CAMERA

1. Push the B button and hold for 2 seconds.
   a. First the red and blue light will come on.
   b. Next the blue video indicator light will come on.
   c. Finally, the blue indicator light will flash three times and turn off.
   d. The camera is not recording live video.
2. To stop recording, press and hold the B button again for 2 seconds.
   a. The red indicator light will flash several times.
   b. The camera has now stopped recording video.
3. To resume recording, start again from step 1.

HOW TO USE THE PHOTO CAMERA

1. Push the B button and hold for 2 seconds.
   a. First the red and blue light will come on.
