

blow by partial destruction or damage. Even though such damage may not be visible, the hard hat should be destroyed or replaced if it has received serious impact. Unfortunately, some head injuries cannot be prevented by ANY hard hat. Depending on the type of impact, even very low speeds can result in a serious head injury or fatality. Always play with extreme caution and be sure to read this manual throughly.

## OWNER'S MANUAL/ENGLISH

### MODEL: LEGEND LOW RIDER / LEGEND ASIA FIT

Meets EN1385 safety requirements  
of the European Committee for Standardization.

**TO ENSURE PROPER USE OF THIS HARD HAT,  
PLEASE FAMILIARIZE YOURSELF WITH IT'S  
FEATURES AND PROPER CARE BY CAREFULLY  
READING THROUGH THIS MANUAL BEFORE  
WEARING THE HARD HAT.**

#### WARNINGS AND GUIDELINES:

1. All safety equipment has limitations. Read and follow all instructions carefully.
2. This hard hat is intended for water sports. It is not intended for motorsports, moped or other uses.
3. For maximum protection, the hard hat must fit well and all retention straps must be securely fastened.
4. This hard hat is designed to absorb shock by partial destruction of the energy absorbing liner. This damage may not be visible. Therefore, if subjected to a severe blow, the hard hat should be destroyed and replaced even if it appears undamaged.
5. No hard hat can protect the wearer from all foreseeable accidents. Depending on the type of impact, even a low speed accident can result in a serious head injury or fatality.
6. A hard hat can only provide a level of protection for areas that it covers. It does not protect the neck.
7. Please exercise care and good judgement whenever you participate in water sports. Comply with all safety regulations and do your part to avoid accidents.

**8. Do not alter or remove any component of the hard hat. It may make the hard hat unsafe. No attachments should be made to the hard hat except those recommended by the manufacturer.**

#### USER'S RESPONSIBILITIES:

1. Always wear your hard hat in the proper position.
2. Fasten your buckle and tighten your chin strap.
3. Check your adjustments every time you wear your hard hat.
4. Inspect your hard hat regularly for signs of wear and damage.
5. Exercise care and good judgement whenever you participate in water sports.
6. **Don't** wear a hard hat that's been in an accident.
7. **Don't** attach anything to the hard hat unless recommended by the manufacturer.
8. **Don't** wear someone else's hard hat.
9. **Don't** wear anything hard or sharp under your hard hat.
10. **Don't** take unnecessary risks just because you are wearing a hard hat.

#### PROPER FIT:

This hard hat can only protect if it fits well. You should try different sizes and choose the size that feels secure and comfortable on the head. With a proper fit, the hard hat will not move back and forth or side to side while fastened. If the hard hat doesn't fit with installed pads, simply remove them and install another set of different sized pads. To ensure the proper fit, mix and match the pad thicknesses to best fit to your head shape.

#### RETENTION SYSTEM:

Place the hard hat firmly on your head and fasten the buckle. This hard hat uses a quick release buckle that is simple and can be buckled and unbuckled without changing the adjustment. The buckle is simply

connected by inserting the two ends together until you hear a "click" sound. Once buckled, adjust the straps for a snug but comfortable fit and even tension. To open the buckle, squeeze the sides and pull apart. Make sure the buckle has snapped closed when ever using the hard hat. Be sure the buckle is positioned away from your jawbone. **Note: Check adjustment every time this helmet is worn.**

#### VENTILATION:

This hard hat has holes in the front, back and top for maximum ventilation.

#### CARING FOR YOUR HELMET:

We recommend cleaning your hard hat with mild soap and water only. The hard hat may be damaged and rendered ineffective by petroleum and petroleum products, cleaning agents, paints, adhesives and the like without the damage being visible to the user. The padding is removable and should be washed by hand with mild soap and water, rinsed and air dried only. Remove odors by rinsing with a solution of bicarbonate of soda and water. Never use an oven or other heating source to dry the helmet of padding. Hard hats will be damaged if exposed to temperatures exceeding 66°C. Dark coloured vehicles and storage bags can exceed this on very hot days. Heat damaged hard hats will have random disfigured areas where the texture appears bubbly and uneven. If damaged, hard hats should be destroyed and replaced immediately. A hard hat has a limited life span in use and should be replaced when it shows obvious signs of wear. The product box this helmet came in is suitable for the storage and transport of the helmet. Be sure to store the hard hat in a cool, dry place.
