

## 15W LED Gear Trays

If you have existing light fittings that you would like to convert to LED in order to maximise energy efficiency and light output, our 15W LED Gear Trays are the perfect solution.

The 72 LEDs are evenly spread around the aluminium plate to give a fully illuminated effect without any black spotted areas. With 1350 lumens per plate, our customers will find this is ample light output for their fittings.

As with all Signature products, they are backed with our comprehensive three-year warranty and are available in standard, microwave, emergency and emergency microwave versions.
