

Product Number: 8

Envirobrick – Intumescent Fire Brick and Seal

Description:

Temporary or permanent fire protection solution for sealing around pipes, cable trays and cables in wall, floor or ceiling openings. Made from fire resistant sponge with intumescent. Dust and fibre free. Easy to install. In a fire the sponge centre will stop the fire and smoke penetration and the intumescent, which is rubberised, expands holding the blocks together and sealing off the opening

Application:

Envirobrick is easy to install. Can be cut to fit, if necessary using a sharp knife.

Lay the Envirobrick rectangular blocks as bricks to fill any size opening. Can be fitted either way into hollow plasterboard walls – if fitting into a hollow partition wall greater than 200mm we can make a wall lining to fit into the width of the opening first.

Envirobrick circular seals can be used for filling circular holes or pipes and can be cut for pipes, cables, trunking etc to pass through.

Envirograf® black mastic can be used to fill any open joints. Envirobricks can be removed and refitted as required.
