Product Number: 41

Intumescent Fire Proof Sponge

Description:

A fireproof sponge that emits no toxic fumes and is incombustible. This sponge will not burn just char.

Use:

The fireproof sponge can be used under roofing sheets, between walls and floors, or as packing around small openings (such as spaces around windows and door frames in timber buildings).

Application:

Supplied in standard strips and sheets (see price list for full range). Can be supplied ready-profiled for use between shaped roofing sheets and RSJs or walls etc. The sponge can be easily cut to shape and can be faced with Envirograf® CF Cement Filler (Product 63).
