## Product Number: 88 Welding Blankets and Pads

### **Description:**

Easy to handle, non-asbestos welding pads and blankets (available in a range of sizes) withstanding temperatures of up to 1200°C

### **Application:**

The welding pads are used behind blow lands for flame protection to walls, pipes and other fixtures. The welding blankets have fixing eyelets so that they can be hung or fitted around areas that need protection from welding flames and splashes. Both the pads and the blankets are fibre-free making them suitable for use in hospital sterile areas, etc.
