

Product Number: 119

Weather Bar Seal

Description:

This product is a 2100mm PVC sealing strip that is applied to the bottom edge of doors and used in conjunction with Envirograf® Products 106 and 107 (threshold seals) for a complete solution to threshold draught and weather sealing. Available in black, brown, or grey. See also Envirograf® Product 120.

Application:

Envirograf® weather bar seals are either screwed to the bottom of the interior and exterior faces of the door or just the interior if Product 120 has been fitted to the exterior, in such a position as to minimise the gap between the bottom of the door and the threshold sealing strip. Offers effective weather and draught protection when used in conjunction with Product 106 or 107.
