

APPLICATION DATA SHEET

ENVIROGRAF®

AP126-10-2019

Product Number: 126 Protective Covers – Silicone Cloth

Description:

Envirograf protective covers are designed to protect items from the effects of smoke and fire. Manufactured from glass cloth coated on both sides with silicone. They can be made in many shapes and sizes to suit not only artworks but also valuable items.

Use:

The covers can be fitted to stop smoke damaging or affecting artworks etc. They can also help protect against water damage from firefighting measures and could be used during storage of artworks.

Application:

The covers are simple to fit. In the case of paintings; start at the top of the picture and secure the back piece of material over the painting. Straighten the remainder of the cover and stretch the elastic straps around the back of the picture. Made-to-measure covers can be slipped into place over the object.
