

Product Number: 88 Welding Blankets and Pads

Description:

Easy to handle, non-asbestos welding pads and blankets (available in a range of sizes) withstanding temperatures of up to 1200°C

Use:

For use while welding or using blow lamps. The welding pads are particularly useful for plumbers joining pipes to give flame protection to walls, pipes and other fixtures. Envirograf® welding pads and blankets will withstand continuous temperatures of 600°C and short term temperatures of 1400°C.
