Product Number: 153

Fireproof Cable Support System

Description:

A fire resistant cable fixing system designed to fit around plastic trunking, tubing and armoured cables to hold cables in place in a fire situation.

Supplied as silver coloured U-shaped brackets with metal keyhole fixings at either end to fix to the wall above and below the trunking, conduit or cables to be supported. A smaller clip is available which folds around conduit or armoured cable with the keyhole fixings screwed in place above to support the cables.
