

BUILDING INSTRUCTIONS

Hello makers! We hope you have a fantastic time sanding, building and decorating your Truggy. Let's get making!

What's in the kit:

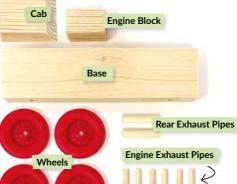

Support triangles

Before you start, fold your piece of sandpaper into thirds.

Glue dots

This makes it easier to hold on to.

a different type

*Tools not included

ashandcompany.co.uk/sanding

Sand the sharp edges of **all** your blocks, including the headlights, spoiler etc.

Hold the sandpaper at a 45° angle to the edge you are sanding for the best result.

We're looking for nice smooth edges so be as thorough as you can!

direction as the grain lines in the wood. This avoids ugly scratch marks!

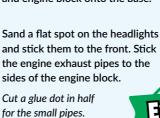

Position the main components on the base before sticking to check you are happy with the layout.

Using glue dots, stick the cab and engine block onto the base.

Make sure the screw and screwdriver form a straight line.

to the base behind the cab. Sand a flat spot on the rear

exhaust pipes and stick them to the base.

ashandcompany.co.uk/screwdriver

Prepare the wheels: push a screw through the centre hole and place a washer over the screw.

Screw the wheels into the holes on the base. Turn the screwdriver to the right (clockwise) to tighten. Be careful not to over-tighten the screws, the wheels should still move.

The rhyme 'Righty tighty, lefty loosey' helps us remember which way to turn!

Sand a flat spot on the bottom of the spoiler and stick it to the back of the base, resting it on the exhaust pipes for extra stability.

Your Truggy should now look like this. Turn over to continue...

DECORATE

Send us photos of your awesome creation for our Star Maker gallery! ashandcompany.co.uk/star

Decorate your Truggy with the custom sticker pack.

Don't forget the number plates and front and rear lights!

Ta-dah!

Congratulations, you've built your very own Truggy!

HOW TO USE GLUE DOTS

Tear a glue dot from the sheet and peel off one side of the backing paper.

before removing the

Peel away the backing paper, trying not to touch the glue dot.

Pull the backing paper to the side, not upwards.

Push the glue dot onto the block.

Push hard to help it stick to the wood.

Firmly push the items you want to stick together.

For larger items, use multiple glue dots
