Dementia Friendly Door Signage

A Wayfinders door sign is used to help identify a room/location to a resident with dementia.

The high contrast and recognizability of the icon helps the user identify its purpose, while the overall sign helps promote the interior of the building.

- 2.8mm Acrylic Panel (Dementia Range Standard)
- Dimensions: 228 x 228mm
- Panel Colour: Oak
- Font: Arial
- Tactile as per the dementia range.
- Fixing: VHB Tape

Paperflex Signage

The paperflex signage allows for a paper insert which allows the staff to edit the text and picture shown on a daily basis. It has a slot on the right hand side to grip the page to ensure it is secure when in use, but easily changed when needed.

- 2mm Anti-Glare Panel & 5mm White Acrylic
- Dimensions: 228 x 228mm
- Panel Colour: Oak
- Font: Arial
- Tactile as per the dementia range.
- Fixing: VHB Tape

Orientational Signage

The orientational signage follows the design of the dementia friendly signage family and comes with the standard text and pictogram. This does not have a removable disc like the directional signage.

- 2.8mm Acrylic Capped ABS
- Dimensions: 105 x 500mm
- Panel Colour: Oak
- Font: Arial
- Tactile as per the dementia range.
- Fixing: VHB Tape
