

WTF SERIES | DEMAND REGENERATION TWIN TANK IRON HANDLER

BENEFITS

- *Designed to filter and remove iron while softening hard water*
- *Can remove up to 10 ppm of clear water iron*
- *Smaller amounts of soaps and detergents are needed*
- *Extended water heater life expectancy*
- *Prevents scale build-up in pipes, fixtures, and appliances*
- *Regenerate one tank while the other is in service!*

WTF SERIES | DEMAND REGENERATION TWIN TANK IRON HANDLER

FEATURES

- Pre-loaded with C-800F fine mesh resin
- Fiberglass tank will not rust
- High capacity polyethylene brine tank
- Fleck 9100 Meter Control Valve
- High flow bypass valve included
- Safety float in brine tank
- Downflow brining, and 2 stage mineral bed
- Warranty
Fiberglass Tank: 10 years
Brine Tank Shell: 5 years
Control Valve & Timer/Motor: 3 years

IRON LEVELS

Less than 0.05 ppm	Excellent
0.05 - 0.3 ppm	Good
0.3 - 0.4 ppm	Usable
0.4 - 0.5 ppm	Passable
Over 0.5 ppm	Unacceptable

Recommended range: 0 - 0.3 ppm

Iron may cause yellow, brown or rusty stains on plumbing fixtures. You can get a metallic taste in foods and beverages. Also, you can get yellow or reddish slime in toilets.

MEDIA (Included)

C-800F Fine Mesh Resin

Coarse Garnet

BRINE TANK MEDIA OPTIONS (Sold Separately)

Coarse Solar Salt

Pellet Salt

Iron Fighting Salt

Potassium Chloride

VORTECH PLATE

Environmentally friendly, reduces backwash requirement by up to 30%.

Designed for over 6,500 lbs. load capacity.

Highly efficient softening regeneration reduces annual salt consumption.

FLECK 9100 VALVE

Demand regeneration, simple to adjust and easy to service with quick access to all internal components.

Stainless steel bypass valve.

Regenerates only as necessary, saving water and salt.
