

Wireless Atomic Color Weather Station with USB Charging

Model: 308-146
DC:110217

POWER UP

1. Insert 2-AA batteries into your sensor.
 2. Insert the 5.0 volt power cord into an outlet, then into your station.
 3. Optional: Install 3-AA batteries into your station for backup.
 4. Once the sensor is reading to your station, mount your sensor outside in a shaded location.
- For detailed instructions on how to power up your clock, please review the full manual at: http://bit.ly/308-146_manual

- The clock will search for WWVB atomic time signal after the power cord is connected or batteries are installed.
- The LCD backlight and USB charging port will momentarily turn off while the station searches for the atomic signal.
- For information about WWVB Atomic time visit: <http://bit.ly/AtomicTime>

SETTINGS

- Hold the SET button to enter set mode.
- Use +/-RCC or +/-C/F buttons to adjust and SET to confirm.

1. WWVB ON/OFF
2. Time Zone
3. DST ON/OFF

- **Hold LIGHT HI-LO:** Turn backlight off. Press to turn on.
- **Press LIGHT HI-LO:** Adjust backlight High or Low.
- **Press HEAT/DEW:** View Heat Index and Dew Point temperature.
- **Press MIN/MAX:** View High and Low temperature/humidity.
- **Press CH:** View other channels if using multiple sensors.

POSITION SENSOR OUTSIDE

- Keep your sensor out of direct sunlight in a well ventilated area.
- We recommend mounting on the north side of your home under and eave or deck rail.
- Transmission range is 300 feet (91 meters) open air.
- Watch sensor mounting video: http://bit.ly/TH_SensorMounting

WEATHER FORECAST ICONS

The unit predicts weather condition of the next 12-hours based on the change of atmospheric pressure. The weather forecast is about 70-75% correct.

Forecast Icons:

- Sunny
- Partly Cloudy
- Cloudy
- Rain
- Storms

This station learns. Please allow 7-10 days for barometric calibration. This will ensure an accurate personal forecast for your location.

CANADA STATEMENT

This device complies with CNR Industry Canada license -exempt devices. Operation is subject to the following two conditions:
(1) This device may not cause interference; and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Increase separation between equipment & receiver.
- Consult the dealer or an experienced radio/TV technician for help.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized changes or modifications to this equipment. Such changes or modifications could void the user authority to operate the equipment.
