308-1911V2 FAQS

We are weather enthusiasts like you and know proper running equipment is important. These FAQS provide valuable information on setup, positioning, and troubleshooting your station. We recommend Adobe Reader version 10 or greater available at: http://get.adobe.com/reader

CONTENTS

GENERAL INFORMATION
BATTERIES: WHAT DO I NEED TO KNOW ABOUT BATTERIES?

- Good fresh batteries are important for best performance in your sensors and as backup in your station.
- Batteries with an expiration date of 2020, were manufactured in 2010.

- We recommend batteries with an expiration date no more than 6 years in advance of the current year for best performance.
- A minimum voltage of 1.48 volt per battery is required for best performance.
- Lithium batteries may be used in outdoor sensors. Alkaline batteries for the station.

WHAT ARE THE POWER REQUIREMENTS FOR THIS STATION?

**308-1911**: 2-AAA batteries

SETUP: HOW DO I SETUP MY STATION?

1. Install batteries into the station.
2. Set time/date.

HOW DO I VIEW FULL WEEKDAY OR DAY, MONTH, DATE?

- Press and release the SETTINGS button to select Weekday or Day, Month, Date to be displayed.

TROUBLESHOOTING
FACTORY RESET: HOW DO I FACTORY RESET MY STATION?

A Factory Restart returns the station to its default settings (erases history) and to "out of the box" condition.

1. Remove batteries from your sensor and batteries from your station.
2. Press any button 20 times.
3. After 15 minutes insert fresh batteries into your sensor, and into your station.
4. Wait 15 minutes to establish a strong connection.
5. Place sensor outside.

WHY AM I GOING THROUGH BATTERIES QUICKLY?

- Test a new set of batteries. Write down the date of installation and the voltage of the batteries.
- When the batteries fail, please note the date and voltage again. This is helpful in determining the problem.
- Check for leaking batteries, which may damage the station.

WHY ARE PARTS OF LETTERS OR NUMBER MISSING?

- This is generally a power related issue.
- Batteries may be overpowered or underpowered. Remove batteries from station.
- Press any button 20 times. Leave the station unpowered for 1-2 hours.
- Install fresh alkaline batteries with correct polarity.

WHY IS MY NEW STATION UNREADABLE?

- On a brand new station, check for thin plastic films of printed scratch guard that may be on the screen. This thin piece of plastic has printed numbers for store displays.
- With all power removed the station should be blank.
- If numbers still appear, please check for scratch guard.
- Check that the batteries polarity is correct.
- This is generally a power related issue.
- Batteries may be overpowered or underpowered. Remove batteries from Station.
- Press any button 20 times. Leave the batteries out of the display for 2 hours.
