

BREWTORIAL BREAKDOWNS

CASCARA TEA

Boil Water

Boil a little more than 12 ounces of water (some will evaporate) while you prep.

Measure Out

Measure out about 9 grams of cascara. We favor a 1:16 brew strength ratio with this tea, so 9 grams of cascara will yield about 12 ounces of tea.

Brew Temp

A good brew temperature for cascara is under 200 degrees fahrenheit.

Pour

Add your 12 oz. of water the your coffee cherry tea and start a timer. At 200° your tea will be ready after six minutes.

CASCARA TEA

Quick Reference

Tea input	9g
Time	6:00
Water input	12 oz.
