### **CUP CHARACTERISTICS**

From our house to yours, the Seabright House Blend is classically sweet and undeniably inviting. A balanced acidity and fudge-like body are complemented with aromas of sweet, toasted coconut in this year-round blend.

### **SOURCING INFORMATION**

Since its opening in September 2012 in the Seabright suburb of Santa Cruz, our Seabright home-office and roastery houses all coffee sourcing, roasting and administrative functions in support of Verve's growing fleet of retail cafes. It's therefore only appropriate that "Seabright" would be the namesake for our welcoming-most blend of all.

When going about blending a "house" blend, we sought coffees that would work together to deliver balance, body and a complex sweetness. As such, Seabright House Blend features coffees sourced from small-holder farmers in the Andean foothills in and around the department of Cauca, Colombia. Two carefully-developed roast profiles work together to guarantee balance and dessert-like sweetness year-in, year-out.
