

ACRYLIC ZONE SCULPTING ON A FORM

- 1. After prepping the natural nail, use a **Nail Wipe** saturated with **Nailpure Plus** to wipe the nail.
- 2. Snuggly fit a **Platinum Nail Form**.
- 3. Apply Essential Bond liberally to the natural nail.
- 4. Using a medium-wet mix ratio, place a medium sized bead of **Radiant White Powder** near the smile line.
- 5. Gently press the smile line into place, guiding and pressing the product into the corner of the smile line.
- 6. Using **Radiant Pink Powder**, press out a medium-wet bead in Zone 2 just beyond the smile line. Press gently from side to side to coat the nail evenly.
- 7. Place another bead in Zone 3 near the product in Zone 2. Angle your brush and thin the front of the bead so it leaves a tiny margin around the cuticle.
- 8. Using an **Endurance 180/180 Grit File**, define the shape. Remove excess dust with **Plush Brush**. Using a **Nail Wipe** saturated with **Cleanse**, remove any dust hiding in the side walls.
- 9. Apply **Glaze 'n Go LED**, in polish style strokes, and cure in the **Dual Cure Lamp**, LED, for 30 seconds or UV for 2 minutes.
- 10. Condition the cuticle and surrounding skin with Nurture Oil.
