

## DIPPED FRENCH DEMO WITH SIMPLICITE POLYDIP SYSTEM

Our Dipping systems are compatible with all our Acrylic powders

- After proper nail prep, apply a thin layer of Simplicité PolyBase Clear to all 5 nails and cure in the Dual Cure Lamp, LED for 30 seconds or UV for 2 minutes. Repeat on the other hand.
- 2. Apply a thin layer of **Simplicité PolyBase Clear** to all 5 natural nails. Dip into the **Attraction Radiant White** at a 45 degree angle, for the desired depth of the smile line to create the french extension edge.
- 3. Then, slide and glide evenly into the **Attraction Pink Powder** of your choice at a 45 degree angle. Cure in the **Dual Cure Lamp**, LED for 30 seconds or UV for 2 minutes. Brush off excess powder with **Plush Brush**. Repeat on the other hand.
- 4. Apply **Simplicité PolyBase Clear** to all 5 natural nails in a thin layer. Slide and glide on 2/3 of the nails' length evenly into the **Clear Simplicité Powder** to encapsulate the nail.
- 5. If you need to create a higher apex, apply **Simplicité PolyBase Clear** at the apex and dip into clear again. Cure in the **Dual Cure Lamp**, LED for 30 seconds or UV for 2 minutes. Brush off excess powder with **Plush Brush**. Repeat on the other hand.
- 6. Apply **Essential Seal** to all 5 nails and cure in the **Dual Cure Lamp**, LED for 30 seconds or UV for 2 minutes. Repeat on the other hand. Wipe off the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**.
- 7. Using an **Endurance 180/240 Grit Buffer**, gently file and lightly buff the nail to refine the surface. File the nail so it is smooth, balanced, and there are no rough spots. Wipe off any dust using a **Nail Wipe** saturated with **Cleanse**.
- Apply Essential Seal and cure in the Dual Cure Lamp, LED for 30 seconds or UV for 2 minutes. Repeat on the other hand. Wipe off the tacky dispersion layer using a Nail Wipe saturated with Cleanse. Condition the cuticle and surrounding skin with Nurture Oil.
