

EASY PEARLY FLOWER NAIL ART DESIGN

using your favourite Pearly White or another Colour or Glitter of your choice, endless possibilities

- Prep the natural nail. Apply a tip or nail form if an extension is desired. Apply Essential Base Coat as a base and cure in the Dual Cure Lamp, LED for 30 seconds or UV for 2 minutes.
- Starting in Zone 3, apply a coat of Builder Gel Blush evenly to the entire length of the nail. Cure in the Dual Cure Lamp, LED for 60 seconds or UV for 2 minutes. Build additional layers if required for building the apex for strength and cure again.
- 3. File into shape ensuring the surface contours are flush. Clean the surface with a **Nail Wipe** saturated with **Cleanse**.
- Coat the entire surface of the nail with a layer of Essential Seal. Cure in the Dual Cure Lamp, LED for 30 seconds or UV for 2 minutes. Using a lint-free Nail Wipe, remove tacky layer with Cleanse.
- 5. Create your design gel mixture for the design into a little dish or palette; eg. you can mix your favourite white Gel Polish or white paint with Glaze'N GO. Using your HD Detailer Brush, take your mixture little by little to create and perfect your flower & designs. Cure into the Lamp LED 60s or UV for 2mns. Use multiple layers to achieve a more detailed look, cure in between each layer or lock freeze into the lamp for 10s when you're happy with part of your design, it allows you to secure it as you go finishing painting your design.
- 6. You can use a Tack Free Topcoat for a matte of glossy finish at the end to protect and seal your design. If you've used Glaze'N GO tack free or your favourite Tack Free Topcoat, you've got a smooth and finished sealed design already done.

 Apply Nurture Oil to cuticle area and massage on nails and skin.
