

GLITTER ACRYLIC STILETTO WITH ONE STROKE NAIL ART

1. After natural nail prep is done, apply an **NSI Stiletto Nail Form** making sure that the form fits tight and snug.
2. Apply a thin layer of **Attraction Totally Clear Powder** and extend it past the free edge and onto the form, creating a platform for your colours to sit on. Pinch form until product has set up. Then, carefully remove form and file into shape.
3. Using an Opaque colour **Attraction Powder**, cover the natural nail plate and create a smile line. Once set, using an **Endurance File 180/180**, refine file the smile line to give it a crisp edge.
4. Using the **Simplicité Powders**, colour of your choice, start application at smile line and feather your first colour out. Apply second colour slightly on top of first and repeat process. Using **Attraction Totally Clear Powder** and your choice of **Secrets Sparkle**, add dimension to your design.
5. Encapsulate your entire free edge using **Attraction Totally Clear Powder**. Continue to pinch your free edge while your product is setting up.
6. Refine file using **NSI Endurance File 180/180** and then buff the entire nail using the **Endurance Buffer 180/240**. Wipe with a nail wipe saturate with **Cleanse** to remove all dust.
7. Using acrylic paint and a one stroke brush, mix and blend your colours creating a flower design. Continue adding different colours to give depth and dimension. Allow paint to completely dry.
8. Using **Glaze 'n Go LED**, apply a thin coat to the entire nail and cure in the **Dual Cure Lamp**, LED for 30 sec or UV for 2 min. **Glaze 'n Go LED** coat cures tack-free so there is no layer to remove. Apply Nurture Oil and gently massage in.
