

GLITTER PARTY NAIL WITH POLISH PRO

- After shaping the free edge of the natural nail, gently push back and remove the cuticle with an orangewood stick or other implement.
 A gentle, light buffing using an Endurance 180/240 Grit Buffer to remove surface oils will improve adhesion. Clean and dehydrate the nail plate using a Nail Wipe saturated in Nailpure Plus.
- 2. Apply a thin layer of **Essential Base Coat** to all five fingers. Be sure to cap the free edges. Cure in the **Dual Cure Lamp** for 2 minutes in UV, or an LED lamp for 30 seconds.
- 3. Choose a **Polish Pro Colour**, shake well before use. Apply a thin even layer. The first layer may look translucent. Cure in the **Dual Cure Lamp** on LED for 30 seconds or UV for 2 minutes. Apply a second layer of colour (for full coverage) and cure again.
- 4. Before removing the tacky layer, dry brush your choice of **Secrets Sparkle** onto the nail using a soft dry brush. The glitter will stick to the tacky dispersion layer. Use quick, light brush strokes to dust off any excess glitter from nail surface.
- 5. Apply a layer of **Essential Seal**, sealing and capping the edges. Cure in the **Dual Cure Lamp** for 2 minutes in UV lamp or 30 seconds in LED. If the nail feels coarse from glitter, apply a second coat of **Essential Seal** and cure again.
- 6. Remove the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**. Condition the cuticle and surrounding skin with **Nurture Oil**.
