

## NATURAL NAIL OVERLAY WITH BALANCE GEL SYSTEM

1. After proper nail prep, use the flattened side of your brush to gather a small amount of **Balance Gel**. Starting in Zone 3, brush the entire length of the nail ensuring to coat the nail evenly.
2. **Balance UV Gel**: Cure for 2 minutes in UV. – **Balance LED/UV Gel**: Cure for 60 seconds in LED or 2 minutes in UV.
3. Do not remove the tacky dispersion layer. Apply a second coat of gel if necessary. This depends on the desired length, activity level and fashion preference of the client.
4. **Balance UV Gel**: Cure for 2 minutes in UV. – **Balance LED/UV Gel**: Cure for 60 seconds in LED or 2 minutes in UV.
5. Check the nail from all angles to ensure proper apex placement. If necessary, add a small amount of a **Builder Clear Gel** to the upper arch.
6. **Balance UV Gel**: Cure for 2 minutes in UV. **Balance LED/UV Gel**: Cure for 60 seconds in LED or 2 minutes in UV.
7. Wipe off the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**.
8. Refine surface and check for proper design and apex placement. File the nail so it is smooth, balanced, and attractive following the curvature of the nail. Remove excess dust with your **Plush Brush**. Use a **Nail Wipe** saturated with **Cleanse** to remove any dust that may be hiding in the side walls. Apply evenly a layer of Essential SEAL and cure 60s in LED and 2mn in UV. Use Essential SEAL in polish like strokes. Be sure to cap the free edges. Cure 60s in LED and 2mn in UV. **The tacky dispersion layer left on the nails after the cure into the lamp is normal, you will need now to remove it.**
9. Remove the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**. Condition the cuticle and surrounding skin with **Nurture OIL**.
