

Top/Side Loading Frame Assembly Instructions

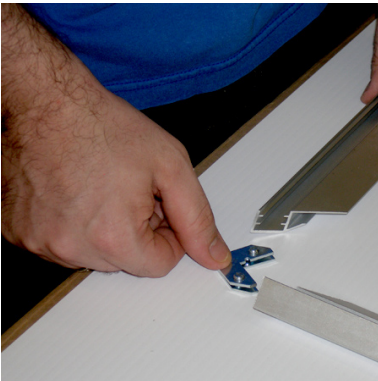

Step 1:
Remove Wrapped
Frame Rails From Box

Step 2:
Un-Wrap each Frame Rail
(3) Large Rails Included
(1) Small Thin Slot Rail

Step 3:
Slide in Hardware Corners.
Place (B) Plate (With Screws)
Over (A) Plate.

Step 4:
Place Hardware Corners into Ends
of Mitered Frame Rails

Step 5:
Join Mitered Corners.
The Hardware Slides Into Channel

Step 6:
Use Philips Screwdriver and
Tighten Screws on Hardware.
Repeat for all four corners.

Step 7:
When all (3) Large Rails are
assembled, tighten the fourth
and Final Slot (Thin) Rail.
This is the side that the Poster
will Slide into.

Step 8:
Install Frame onto Wall
with Hardware Screws Provided
(Look for Pre-Drilled Holes)

Step 9:
Insert Graphic. Place Backing
Board and Overlay into Frame
(If Applicable). Poster should be
sandwiched between both.
