Step 1
Measure where you want the top of the frame to be positioned. Drill holes in wall for Metal Z-Bar. Secure Metal Z-Bar to the wall using screws and wall anchors provided.

Step 2
Place Swingframe onto Metal Z-Bar. Mark holes in bracket at bottom of Swingframe with pencil. Remove Swingframe from wall, drill holes and insert wall anchors.

Step 3
Replace Swingframe over Metal Z-Bar. Insert screws through the bracket holes and secure into wall anchors with screwdriver.

Simple hand tools required: Level, Pencil, Drill, Phillips Head Screwdriver
