

**LCH-ALT500 Leak Detector** is designed for detecting the leakage of pipe systems, air intake system and cooling tank, which conforms to SAE standards. It can produce smoke fast with large volume, which can effectively help technician improve working efficiency. It's a professional tool which can help you find leakage in any pipe system quickly. It is one of best smoke leak test tool in the market.

## LCH-ALT500 Leak Detector

LCH-ALT500

Designed for detecting the leak of pipe systems in cars, motorcycles, such as fuel pipe, air intake system and cooling tank. It can change special oil (baby oil or mineral oil) into smoke, and blow smoke into sealed pipe system. You can find out leak point in pipe via the smoke and fix it where leak exists. Inbuilt mini air compressor, instant smoke generation. Self-protection system keeps machine away from overload. Easy operation and quick locating the leak parts.

## Features

- | Built-in Air Pump
- | MCU Control with LED Display
- | Double Pressure Gauges
- | Double Flowmeters
- | Intake System Leak Test
- | Exhausts System Test
- | Fuel System Test
- | Coolant Tank Test
- | Combustion Chamber Test
- | Leakage Quantity Test
- | EVAP Test Mode
- | Turbo Test Mode
- | Smoke Test Mode
- | Air Test Mode
- | For Various Motor Vehicles

## Specifications

- | Voltage: DC12V (Optional AC100-240V Power supply)
- | Current: 6A
- | Test Pressure: EVAP: 5-8 KPa TURBO: 0.8-1.20 Bar
- | Air Flow: 1-25 L/Min
- | Oil Volume: 30 ML
- | Oil Consumption: 0.5 ML/Min
- | Test Hose Length: 2.5 M
