

TIT-202 PRO
THERMAL IMAGING CAMERA

BAD			

Built-in database, assist to analyse the problems of vehicle efficiently and effectively. Visually show good or bad status of the vehicle.

Using the advanced infrared technology, TIT-202 PRO can convert the radiation information into image, and clearly displays on the color screen. It reflects the slight defect as small temperature difference while the diagnostic device cannot detect them.

FEATURES

- Can be used at any area of a vehicle to easily capture the IR image and detect the hard-to-reach areas.
- Detect the problems of the vehicle efficiently and effectively, cover engine fault, body air tightness, exhaust pipe, brake system, body heating, bearing system, electrical device and more.
- Extensive high resolution images storage up to 20,000.
- Comprehensive database of automotive applications, cover the info of good situation, bad situation and also diagnostic tips for the technicians.
- More and more repair shops actively to take advantage of the thermal imaging technology in the daily diagnosis.

SPECIFICATIONS

DISPLAY	3.5" 240*320
IMAGE STORAGE FORMAT	JPG
STORAGE	Up To 20,000 pictures
COLOR PALETTE	Rainbow, iron red, cool color, black and white, white and black
VISIBLE LIGHT CAMERA	300,000 pixels
INFRARED IMAGE RESOLUTION	252*192
USB INTERFACE	Micro USB2.0
TEMPERATURE MEASUREMENT RANGE	-20-550 C(-4-1022°F)
DIMENSION	224*75*102(mm)
WEIGHT	350g
