

**KWB-521
Wheel
Balancer**

KWB-521

LAUNCH

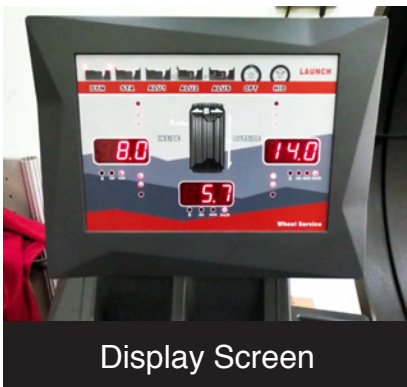

KWB-521 is the most cost-effective wheel balancer. It is the top choice by many end users everywhere. It supports various balance modes and maximizes its usage.

Features

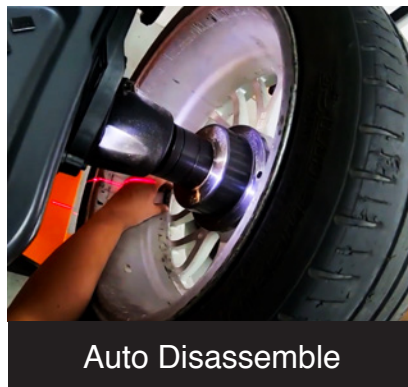

- | Automatic measure three parameters distance ("A" Value)
- | Automatic brake positioning/Laser positioning
- | Show the amount of weight needed directly
- | Function switch combination key for tire rim optimization combination
- | Automatically perform ALUS balancing
- | OPT/HID function
- | Wheel width: 1.5 - 22"
- | Rim diameter range: 12 - 24"
- | Max. wheel diameter: 650mm
- | Max. wheel weight: 75kg
- | Balance cycle: 7s
- | Balance speed: 180rpm
- | Voltage: 220V

Specifications

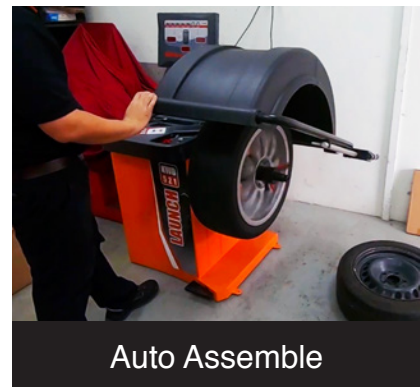

- | Working Voltage: 220 V
- | Rim Diameter Range: 12-24"
- | Max. Wheel Diameter: 650 mm
- | Wheel Width: 1.5-22"
- | Max. Wheel Weight: 75 kg
- | Tolerance of Measure: +/- 1,0 g
- | Measuring Time: 7 s
- | Measuring Speed: 180 rpm
- | Motor Power: 0.75 kW
