

ALWAYS RINSE AND SPIN BEFORE YOU BEGIN

SMOOTH 5MM NAP - SPRAY LIKE FINISH

Our 5mm-nap microfibre mini rollers are best for painting the likes of furniture, kitchen units, window frames, and door frames — essentially anything small that requires a smooth, spray-like finish. By enabling you to achieve a flawless finish without a spray gun, these 5mm rollers allow painters to transform old kitchens and furniture at seriously low cost.

SEMI SMOOTH 10MM NAP - SUPERIOR FINISH

This particular roller holds a considerable amount of paint, washes out easily, and is ideal to cut walls and ceilings in conjunction with our 10mm-nap big rollers, as doing so will result in a uniform finish with no picture framing. Perfect for use on radiators, exterior weatherboards, and previously painted surfaces, these mini rollers eliminate the need to lay off your paint.

SEMI SMOOTH PLUS 15MM NAP - SUPERIOR COVERAGE

Excellent for tough projects with tricky challenges, they work beautifully with water-based paints and are particularly recommended for primers and topcoats. Ideal for use on the likes of weatherboards, textured plaster and surfaces, bricks, fences, and gates, the 15mm-nap mini rollers offer remarkable paint pick-up and release and a superior finish. Like with our 10mm-nap minis, there's no need to lay off your paint.

SMOOTH 5MM NAP - SPRAY LIKE FINISH

The 5mm-nap microfibre versions of our big rollers come in both 230mm and 270mm lengths. Designed to be used with enamel paints for the best result, this product suits small- to medium-sized surfaces requiring smooth, seamless finishes (such as flat doors and bathrooms).

SEMI SMOOTH 10MM NAP - SUPERIOR FINISH

The mid-sized nap in our microfibre range, the 10mm big rollers come in 230mm, 270mm, and 360mm lengths to suit a variety of painting jobs. This is the most versatile of our rollers, offering excellent paint pick-up, finish, and release. Able to be used with all water-based paints, the 10mm-nap big roller is commonly used to achieve a top-of-the-line finish on medium- to large-sized surfaces such as walls and ceilings.

SEMI SMOOTH PLUS 10MM NAP - SUPERIOR FINISH

If you're looking to get a job done quickly while maintaining a quality finish, the 15mm-nap microfibre big roller is the product for you. This roller comes in 230mm, 270mm, 300mm, and 360mm lengths and is excellent for slightly textured surfaces such as embossed wallpaper, uneven walls or ceilings, tongue-and-groove timber, and repaints of exterior plaster. The 15mm nap holds more paint and offers a work rate 2.5 times quicker than the 10mm but still results in a similar finish.

SEMI SMOOTH 10MM NAP - SUPERIOR FINISH

Our dacron rollers (available in 230mm, 270mm, 300mm, and 360mm lengths) are only for use with water-based paints. With superb coverage and excellent paint release, these rollers are ideal for painting with difficult colours, as well as for use with wallboard sealers. They'll provide you with exceptional film build on new plaster walls — and while you won't see the exact level of finish you would with our 10mm microfibre roller, you'll easily achieve your desired result regardless of the colour you're working with.
