

## High efficiency and reliable rectifiers

The most efficient power conversion module in the industry! Since the launch the Flatpack2 family has expanded into a wide selection of power ratings and voltages.

Power systems up to the MW-range can be realized using the 10A model addressing small and larger modular data centers' power needs. 220V<sub>DC</sub> power systems provide an excellent alternative to traditional AC UPS providing significant efficiency and reliability improvements.

With 220V<sub>DC</sub>, standard components, cables and distribution can be used and most IT equipment designed for 208/230V<sub>AC</sub> can be connected directly to the 220V<sub>DC</sub> bus.
