SELECTIVE HERBICIDE

ACTIVE CONSTITUENTS:

300 g/L **MCPA** PRESENT AS THE POTASSIUM SALT

20 g/L **CLOPYRALID** PRESENT AS THE POTASSIUM SALT

15 g/L **DIFLUFENICAN**

GROUP 12|4 HERBICIDE

FOR THE CONTROL OF CERTAIN BROADLEAF
WEEDS IN TURF AS SPECIFIED IN THE
DIRECTION OF USE.

500mL

DIRECTIONS FOR USE

RESTRAINTS

DO NOT apply if weeds or turf are under stress or when frosts are imminent.

DO NOT use if rain is expected within 4 hours.

DO NOT use clippings as mulch around other plants or for composting.

DO NOT use on Bent grass or Winter grass golf and bowling greens.

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift.

Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one to two hours after sunrise.

SPRAY DRIFT RESTRAINTS

Specific definitions for terms used in this section of the label can be found at apvma.gov.au/spraydrift

Situation	Weeds Controlled	Rate
Turf	Broadleaf weeds including; White Clover (<i>Trifolium repens</i>), Plantain (<i>Plantago lanceolata</i>), Capeweed (<i>Arctotheca calendula</i>), Cat's ear (<i>Hypochoeris radicata</i>), Bindii (<i>Jo-Jo, Onehunga</i>) (<i>Soliva sessilis</i>), Cudweed (<i>Gnaphalium spp.</i>), Creeping oxalis (<i>Oxalis corniculata</i>)	5 L in 200 - 500 L water/ha or 50 mL in 2 - 5 L water per 100m ²

Critical Comments

Apply to actively growing weeds.

Transient discolouration may occur on Kikuyu, Carpet grass and Queensland Blue Couch.

Varietal differences in certain Buffalo grasses (e.g. ST85) may produce more pronounced effects and it is recommended that small areas be tested for turf safety before large-scale application occurs.

Avoid exceeding application rates through overlapping sprayed areas.

Use a surfactant for difficult to wet weeds.

**NOT TO BE USED FOR ANY PURPOSE, OR
IN ANY MANNER, CONTRARY TO THIS
LABEL UNLESS AUTHORISED UNDER
APPROPRIATE LEGISLATION**

WITHHOLDING PERIODS

DO NOT graze treated turf or feed turf clippings from any treated area to poultry or livestock.

GENERAL INSTRUCTIONS

For best results the turf and weeds should be actively growing at the time of treatment.

Complete weed death may take up to 6 weeks. Faster results can be expected on smaller weeds.

Due to residual effects of diflufenican over-seeding treated areas within 3 months of application may inhibit establishment of the turf grass.

Pourability

If cold temperature environments (less than 5° C) are encountered during product preparation for application the product will be difficult to pour. Should this be the case, it is recommended to shake or stir the contents of the product container for about 5 minutes prior to use.

Mixing

Shake original container before use. Agitate continuously to ensure thorough mixing before and during application. Only mix sufficient chemical for each day's work. Surfactants (if used) should be added after LAWNHUB NSFWE SELECTIVE HERBICIDE and water are mixed when the spray-tank is almost full.

Mowing

Avoid mowing during the 3 to 4 days preceding or following treatment.

CLEANING SPRAY EQUIPMENT

THOROUGHLY CLEAN ALL APPLICATION EQUIPMENT AFTER USE.

Rinse water should be discharged onto a designated disposal area or if unavailable onto unused land away from desirable plants and water-courses.

Partial Cleaning *(before spraying tolerant turf):*

After using LAWNHUB NSFWE SELECTIVE HERBICIDE, empty the tank completely and drain the whole system. Thoroughly wash inside the tank with a pressure hose. Quarter fill the tank with clean water and circulate through the pump, line, hoses and nozzles. Drain and repeat procedure twice.

Complete cleaning *(before spraying susceptible plants):*

After using LAWNHUB NSFWE SELECTIVE HERBICIDE empty the tank completely and drain the whole system. Thoroughly wash inside the tank with a pressure hose. Quarter fill the tank with clean water and circulate through the pump, line, hoses and nozzles, then drain. Quarter fill the tank again and add an alkaline detergent at 500 ml/100 L water and circulate through the system for at least 15 minutes. Drain, remove filters and nozzles and clean separately. Rinse inside the tank thoroughly using a pressure hose and flush system with clean water.

COMPATIBILITY

No information is available that indicates physical compatibility with other products. Tank-mixing other products with LAWNHUB NSFWE SELECTIVE HERBICIDE cannot therefore be recommended. As formulations of other manufacturers' products are beyond the control of THELAWNHUB PTY LTD, all mixtures should be tested prior to mixing commercial quantities.

PRECAUTIONS

Manual Handling of Turf

Hand-weeding and transplanting should not be performed before 2 weeks after spray application, unless workers wear overalls (or equivalent clothing) and chemical resistant gloves.

Re-Entry Period

DO NOT allow entry into treated areas until the spray has dried. When prior entry is necessary wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves.

Clothing must be laundered after each day's use.

PROTECTIONS

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Spray drift from LAWNHUB NSFV SELECTIVE HERBICIDE application may cause injury to herbaceous plants, vegetables, fruit crops, vines, ornamentals and trees.

DO NOT use clippings from treated areas for mulch around vegetables or fruit trees.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish and other aquatic life. DO NOT contaminate streams, rivers or watercourses with the chemical or used containers.

STORAGE AND DISPOSAL

(250mL to 20 L only): Store in the closed, original container in a dry, cool, well-ventilated area, out of direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. **DO NOT** dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations.

DO NOT burn empty containers or product.

Refillable containers (1000 L only): Store in the closed, original container in a cool, wellventilated area.

DO NOT store for prolonged periods in direct sunlight.

Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

This container remains the property of THELAWNHUB PTY LTD.

Envirodrums (100, 110, 120, 200 L only): Mini Bulk Returnable Container: Store the original sealed Envirodrum in a cool well ventilated area.

DO NOT store for prolonged periods in direct sunlight.

DO NOT tamper with the Micro Matic valve or the security seal.

DO NOT contaminate the Envirodrum with water or any foreign matter.

After each use of the product, please ensure that the Micro Matic coupler delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of THELAWNHUB PTY LTD.

SAFETY DIRECTIONS

Harmful if swallowed. Will damage eyes. Will irritate skin. Avoid contact with eyes and skin. When opening the container, preparing the spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist, washable hat, elbow-length PVC gloves and goggles. If product in eyes, wash it out immediately with water. Wash hands after use. After each days use wash gloves, goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre.

Phone Australia 13 11 26, New Zealand 0800 764 766.
