

CreteBeater® is a non-toxic, non-corrosive, environmentally friendly liquid for removing concrete and cement from tools, equipment, machinery and other surfaces.

CreteBeater® does not contain any Muriatic, Phosphoric or Citric acids and is, therefore, non-corrosive. It is safe to use on factory finish lacquered painted surfaces, aluminium, glass and rubber. It is safe for both human handling and for the environment. The concrete remover is biologically degradable and can be discarded in the normal sewage system (EAK 17 09 04).

CreteBeater® dissolves concrete by breaking down the bond of cement, making concrete layers bubble up and release from the surface.

Use **CreteBeater®** to clean cement equipment, ready-mixers and pump trucks, mixers and hand tools. It is harmless to aluminium, painted surfaces, glass and rubber and can be used to remove concrete from almost any surface.
