

# VIBRATORY PAVER ROLLERS

**BARTELL  
GLOBAL**

[BartellGlobal.com](http://BartellGlobal.com)

# FEATURES & BENEFITS

The Vibratory Paver Roller is ideal for the installation of large slabs and pavers

Designed to work with all pavers and slabs, the BPR1080 effectively works your polymeric sand material into the joints – right down to the bedding layer! The rollers glide gently over a wide range of stone/concrete textures and thicknesses to provide effective joint consolidation without cracking or chipping, which can happen when using traditional compactors.

# COMPLETE LINE

TECHNICAL SPECS	BPR1080H-4	BPR1080H-5
Number of Rollers	FOUR	FIVE
Weight	243 lbs (110 kg)	258 lbs (117 kg)
Engine	Honda GX160	
Dimensions	21.5" x 26" x 48"	
Vibration Freq	93Hz / 5600 RPM	
Compaction Force	2381 lbf / 10.5 kN / 1080 kgf	

Pavers are getting bigger and thinner as technology advances.

Bartell Global is advancing with them! Leave your plate compactor in the dirt where it belongs. Upgrade to a more elegant solution for your more distinguished materials.

The BPR1080 can be configured with either 4 or 5 rollers, depending on job conditions. Spreading the weight of the machine over more contact points will even further protect the most fragile materials. Revert back to 4-rollers to increase the force on more rugged stones.
