DIFFUSER
FOR HYUNDAI i30N HATCHBACK
INSTALLATION MANUAL

DIFFUSER FOR HYUNDAI i30N HATCHBACK

①

TEST FITTING

Align the diffuser to the OEM rear bumper, so that the exhaust tips are in middle position. If your car is equipped with adjustable exhaust tips, you can easily adjust the right position.

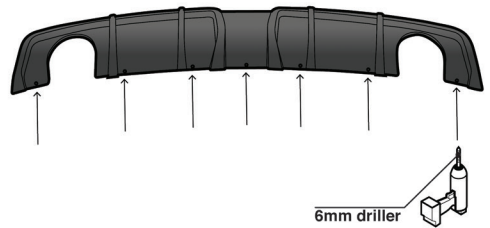

②

PRE DRILLING THE HOLES

PLEASE NOTE: It is easiest to put the upper part of the diffuser on first and then slightly press the lower part onto the bumper.

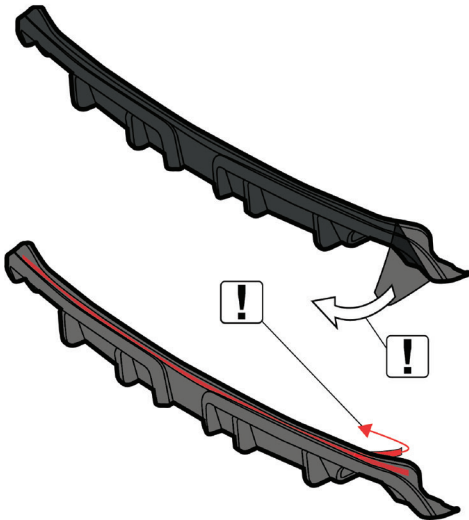

Slightly push the diffuser on the OEM rear bumper to avoid poor clearance. With the diffuser in the correct position, you can now pre-drill the holes below the OEM bumper. Please clean the OEM rear bumper and make sure that it is free of grease.

REMOVING PROTECTION FILM & PREPARING THE DOUBLE-SIDED TAPE

③

You can now remove the protection film of the diffuser and also the protection of the double-sided tape.

APPLYING THE DIFFUSER TO THE BUMPER

④

Now bring the diffuser back into the correct position on the OEM bumper. Now press the diffuser slightly on the OEM rear bumper. Please make sure that the double-sided tape has a good connection to the OEM rear bumper. Now secure the Diffuser with the supplied screws.
