Understanding your display

NOTE:

1. This panel has various touch function areas.
2. The panel uses power off memory to remember your settings.

1. **Motor Selection area** - Allows you to select which motor you want to program.
2. **Working status display** - Shows you if the selected motor is working 'ON' or not working 'OFF').
3. **Time display.**

To set the time press and hold the Pause/Play  button until the colon (:) between the time stops flashing. Use the left arrow to change the hours and the right arrow to change minutes.

4. **Turns Per Day** - This section allows you to change the TPD for the motor you have selected.

5. **Direction of travel** - Press the direction button to switch between Clockwise, Anticlockwise or bi-directional. (Please consult you watch manual for guidance or contact us for help)

6. **Light** - Press this to turn on and off you internal light

Understanding your remote
