

## REZENERATE MBK AQUA PURE NANOFACIAL

1. **CLEANSE:** Pump a small amount of Foamy Cleansing Cream onto dry skin and massage in. Remove cleanser completely with steamed towel. Perform second cleanse if client is wearing heavy makeup or if skin is oily.
2. **REZENERATE:** Apply Aqua Pure Serum evenly over the skin. Apply Rezenerate HyRez Glide in each section as you perform the Rezenerate portion of the NanoFacial as detailed in the Rezenerate Manual.
3. **REJUVENATE:** Apply the Eye Contour Serum around the eye area (eyelid, corner of the eye, & under the eye). Use the MBK Eye Rejuvenator Device on top of the Serum, making sure your hand is in direct contact with the contact plate. Gently glide the device from the inner to outer corner of the eye, pausing 3-5 seconds on acupuncture points. When the device beeps, switch to the other eye. After the eyes are complete, move to the lip area. Apply HyRez Glide (to provide slip) around the vermilion borders of the mouth, then use the MBK Eye Rejuvenator until it beeps.
4. **MASK:** Apply Aqua Pure Mask. Roll over the mask with NanoGlobes to enhance the client experience and cool the skin. Remove mask with gauze, no need to use any steamed towels or water.
5. **FINISH:** Apply Aqua Pure Cream and massage in the skin.

*Best wishes, Team Rezenerate!*

\* Rezenerate is 'Product Neutral' and does not promote or endorse any specific product line. The above protocol was created and endorsed by a Rezenerate user like you to be shared with their fellow RAPs. Rezenerate itself has not necessarily performed the protocol and, as always, asks that you rely on your expertise as a skin care professional when determining what products are best to use on your clients.
