Note 2: During the month of November, you need to be prepared for temperatures below -25 Fahrenheit during the day. Please bring appropriate clothing and warm patches.

### Must Know for Archery hunters

We are Not allowing mechanical broadheads in our hunts. We recommend a fixed blade that weighs 125 grains. Arrows must weigh a combined weight of 400 grains, by regulation.

Persons hunting big game in Alberta must use an authorized bow and an authorized arrow. An authorized bow is one that is held, drawn and released by muscular power and has a draw weight of not less than 18 kg (40 lb.). This is the number of kilograms (pounds) required to draw an arrow of 71 cm (28 in.) to its head. An authorized arrow is one that is not less than 61 cm (24 in.) in length that has a tip that bears a head that is not intentionally designed to resist being withdrawn after it has penetrated an object. Furthermore, it must either have a solid, sharp cutting head of at least 7/8 inch in width, or a head that, when the arrow impacts, opens to present sharp cutting edges at least 7/8 inch in width.

## Trophy Hunts

### Must Know for Cross-bows hunters

Cross-bows may not be used to hunt big game during archery-only seasons.

Persons hunting big game with a cross-bow must use an authorized cross-bow and arrow (bolt). An authorized cross-bow is one that requires 100 pounds or more of pull to draw the string or cable to its cocked position. There is no restriction on arrow length, however it must have a tip that bears a head that is not intentionally designed to resist being withdrawn after it has penetrated an object. Furthermore, it must either have a solid, sharp cutting head of at least 7/8 inch in width, or a head that, when the arrow impacts, opens to present sharp cutting edges at least 7/8 inch in width.

### Our Hunting Cabins and Territory

The following big games are hunted out of our hunting cabins:

- Whitetail Deer
- Mule Deer
- Timber Wolf
- Coyote

Our hunts take place in Wildlife Management Units (WMU) 322, 330 and 332 which extend more than 50 miles west of the town of Rimbey, Alberta, Canada.

- Our hunting lodge is located 20 miles west of the town of Rimbey, in the middle of the hunting area.
- Our lodge is modest, rustic and comfortable even during our cold Canadian Winter.
- Connected to the grid, propane gas heaters and hot water, wood stove, Wi-fi and hot tub.

[Click here to access our Google Map location](#)

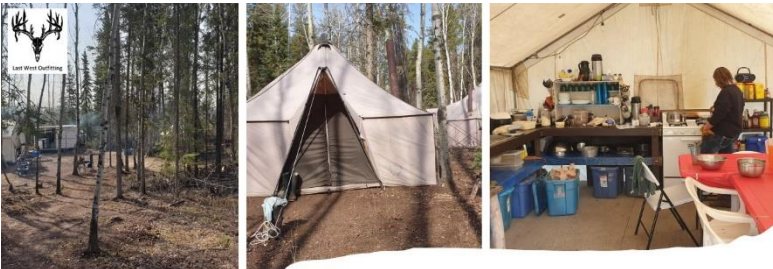

- In September, expect warm temperatures during the day (70 to 80 Fahrenheit) dropping quickly to 50 to 60 F by sunset. Could be below 50 F when walking to the stand early morning.
- Mosquitos are fading by mid-August but some will make it through to early September.
- By November, the temperatures will drop below – 30 F and the ground will be covered in snow.
- Part of the hunting area is bush country, and as wild as it can get. You will spot coyotes, moose and maybe elks. And, you may encounter brown bears, cougars, Canada lynx and wolves.

## Trophy Hunts

### Our Spike Camp

The following big games are hunted out of our Spike Camp:

- Canada Moose
- Black Bear
- Wolf

Our Spike camp is located north of Fort MacKay, Alberta, in WMU 531.

[Click here to access our Google Map Location](#)

Black Bear Camp  
Northern Alberta

Hunters fly to Fort MacMurray (YMM) where they get either picked up by truck or to fly by helicopter to camp.

The camp is setup with:

- a 12' x 20' wall tent kitchen
- Cabela's 12' x 12' outfitters tents (2 hunters per tent)
- all tents have a wood stove
- a shower
- an outhouse
- a skinning and salting tent
- a gas-powered generator
- a charging station for your electronics

While remote, the camp and most of the hunting areas have cell phone coverage.

The hunting territory is in the boreal forest, composed essentially of conifers, swamps and bogs. It is not uncommon to observe the northern lights from camp. This is as wild as it can get with a very healthy population of Wolves, Wood Buffalos, and Mooses whom travel back in forth between our hunting territory and the Wood Buffalo National Park.

The Wood Buffalo National Park is the largest national park of Canada (17,275 sq mi). It extends from the north-east part of Alberta to the southern part of the Northwest Territories. It is the second-largest national park in the world.
