

SKC

SKC 1L Vac-U-Chamber

Pine Item #51330

DESCRIPTION:

The SKC Vac-U-Chamber is a rigid air sample box that allows sample bags to be filled directly by using negative pressure provided by most personal air sample pumps. Since the air sample does not pass directly through the pump, both pump and sample contamination are eliminated. The Vac-U-chamber's rigid walls will not collapse under vacuum conditions. All surfaces in contact with the sample are constructed of stainless steel or PTFE for inertness.

FEATURES:

- Allows direct filling of SKC air sample bags
- Protects sample pump from contamination
- Rugged heavy-duty construction

APPLICATIONS:

- Industrial VOCs
- Indoor air quality
- Effluent gas samples
- Ground water testing
- Stack sampling
- Ventilation studies
- Hazardous Material (HazMat) testing
