

Tramex

## Tramex Survey Encounter

Pine Item #54451

### DESCRIPTION:

The Survey Encounter, made by Tramex, is the world's most advanced meter for finding moisture behind and underneath wood, plaster, brick, carpeting, vinyl flooring, ceramic tile - even the backside of drywall. The Survey Encounter operates on the principle of non-destructive electrical impedance to give accurate non-destructive moisture readings from five to thirty percent in wood and relative readings for walls, roofing and other construction materials. You will never have to drill a hole in a wall or floor again. Move the meter along the surface of any construction material and track a leak to its source. The Survey Encounter stores up to 625 readings in 25 files. It rents with software that downloads data to a PC for spreadsheet analysis on graphs and charts.

### FEATURES:

- Library of 32 wood species plus three wall three roofing types
- Non-Destructive Readings
- Stores up to 625 readings in 25 files can be reached and displayed

## Product Specifications

<b>Measurement Method</b>	Non-destructive signal (impedance)
<b>Frequency</b>	125 kHz
<b>Electrodes</b>	Non-invasive capacitive co-planar conductive rubber
<b>Datalogging</b>	625 readings can be stored in 25 files (25 readings per file). Stored data can be read directly from the LCD display or downloaded to a PC with Windows-compatible software.
<b>Dimensions</b>	US: 6 x 3.2 x 0.24 in. Metric: 152 x 81 x 6 mm
