

Gastec

Gastec Gas Sampling Pumps and Detector Tubes for Gas Identification and Measurement

Pine Item #

DESCRIPTION:

Nextteq's complete line of Gastec pumps and detector tubes precisely identify and measure gases and vapors over 600 applications.

Gastec's patented pumps are lightweight and rugged. The easy-to-pull handle and one-stroke precision piston action provides field-proven, foolproof operation with no partial samples.

They are the only gas sampling pumps with Nextteq's patented Thermal Ring, providing on-the-spot measurement of ambient temperature.

Gastec's detector tubes offer more accurate and reliable analysis with lower standard deviation. Direct-read scales mean faster sampling time without dual scales or concentration charts. With Gastec, you can measure substances other tubes simply can't - no other detector tube manufacturer can measure more substances.

FEATURES:

- On-site measurements can be performed easily by anybody, anytime and anywhere, in a short time
- Easy-to-check direct reading possible due to the calibrated scale directly printed on the tube
- An extensive measuring range can be obtained by adjusting the sampling volume
- In order to assure high precision, each production lot is tested and calibrated independently, Each detector tube has its own quality control number printed on the tube
- Long shelf-life with excellent long-term stability
