

Bluetooth Accessory Kit

Part #: AGA-ASC-BT35

Problem:

Your BMW does not have the capability to play music via Bluetooth.

Solution:

AGA's Bluetooth Accessory Kit allows you to listen to music from your device, without using cords that are messy and in the way.

Benefit:

Eliminate the mess of wires and connect your device to Bluetooth. Our kit is an inexpensive alternative to installing Bluetooth systems.

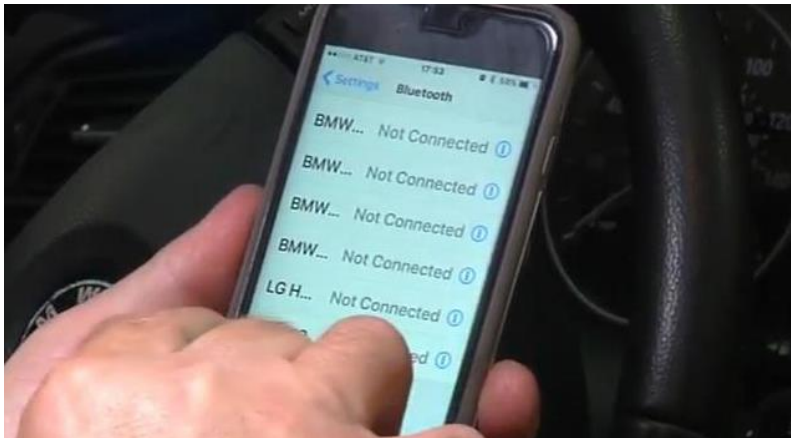

Bluetooth Accessory Installation Instructions

Before using the Bluetooth Accessory Kit, we recommend watching our YouTube video located on our website at www.agatools.com

Step 1:
 Plug AUX cord in to Bluetooth Accessory Kit. Then plug Bluetooth into the USB connector and Plug the AUX cord into the AUX-IN port.

NOTE: If your vehicle does not have a USB port but still has an AUX input, you can supply the USB adapter with power from a small 12V to USB changer adaptor.

Step 2:
 Pair your phone to Bluetooth by going to your Bluetooth settings in your phone. Once the device appears, pair the two.

Step 3:
 Once your phone is paired, select AUX on your radio or in multi-media go to the menu (or similar depending on year, make and model) and select multi-media. Then make sure you select AUX.
